Verankerung: ★ 0 ()

Besonderheiten:

Ausrüstung:

Charakteristik: (Ersatzübersetzung)

Canyon almost collector, with a long access but with beautiful views, we can do it by car if we have 4x4. Generally without water except after rains

Hydrologie: (Ersatzübersetzung)

Possible except in fattened areas, but there is a lot of vegetation.

Anfahrt: (Ersatzübersetzung)

We must be located in Campdevàdol, which we will reach by the C17 to Ripoll and continue along the N260 to Campdevàdol.

If we have 4x4, just at the entrance of Campdevàdol, we will go to the right towards Camping Ripolles and the animal shelter. Soon we will leave the campsite on the left and, now on the track, we will go to the animal shelter. Before arriving, the track forks, we will leave to the left the one that goes to the protector and we will continue straight ahead by the orographic right of the torrent. From here the track will be in increasingly worse condition. We will leave tracks on both sides, following the one that goes straight ahead, right next to the stream. Arriving at an old farmhouse (Muiols) we will park.

If we do not have 4x4 we have two options, park leaving the village, in Colonia Pernau, or a little before, past the radar, in Colonia Molinou. On the right there is a track where we can park.

Zustieg: (Ersatzübersetzung)

With 4x4:

We continue along the track straight ahead, soon the track turns left to rise and after 2kms we will reach a point that rejoins the torrent, just before some switchbacks. Point to access the stream.

If we do not have 4x4:

In both options there are tracks that go up to the Collet de Capdevila, a track next to the Quarry and the other by the Torrent de Sant Martí. From the pass we will continue along the track towards the Coll de Graus. A few meters down a path to go down to the same track as with the 4x4.

Tour: (Ersatzübersetzung)

Not too complicated except for the state of the anchorages that will force us to replace cords, etc.

Rückweg: (Ersatzübersetzung)

When the canyon opens we will see a black tube on our right that we can follow. We could also make a last rappel and exit to the right. In both cases to the access track.

If we have gone with 4x4 we will go down.

If we have gone on foot we will have to go up again to the coll de Graus and retrace the access road.
