Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Simple minor canyon, without big rappels or formations. To do if the area is too much water or to combine with Sangas...
To save some of the first rappels

Hydrology: (machine translated)
Throughout most of the route

Access: (machine translated)
We must get to Sangas, in the valley of Soba.
By the N629 from Ramales de la Victoria (p.k. 67) we have the detour by the CA256 to Veguilla. From Collado de Asón also to Veguilla.
Once in Veguilla, at km. 10 there is a detour to Villar and Sangas on the CA663. After one kilometer, at the sharp right-hand bend, we will take the turn to Sangas. One kilometer later we will reach San Bartolomé, and here we turn right to Sangas. Before going up to the village we will find a very sharp left curve and a track in front of us, which we will take. We will park at the end, right next to the river.

Approach: (machine translated)
Cross the stream and continue along the path that goes up the stream on the orographic right. At a point where the trail makes a turn to the east following the riverbed, we will be able to get into the riverbed. Approximately 1.1 km from the car.

Tour: (machine translated)
A couple of interesting rappels and then the rest of the route can be climbed, without big formations.

Return: (machine translated)
When we reach the junction with the Sangas, we will find a path that we will take to the right and soon we will reach the car.
