Summary: (machine translated)
Descent into a granite basin with one of the highest waterfalls in Sardinia

Hydrology:

Access: (machine translated)
In Villacidro we follow the signs "Monti Mannu". This brings us to the Lago di Leni/Lago di Montmannu reservoir and we ride along its northern shore. A bridge brings us to the other bank of a riverbed. We continue along the shore of the reservoir until we reach its southern root, where we cross another streambed. After the bridge, we turn right onto a dirt road and continue following the signs for "Monti Mannu". We follow the forest road for 5.5 km, passing a group of hares on the left, and later a tree nursery on the righthand side. On the left we see the skeleton of a metal footbridge over the Rio Cannisoni. Here we park the car.

Approach: (machine translated)
We continue along the dirt road - also trail no. 109 - for about 1.8 km (25 min.). We come to a fork in the road and take path 113 (sentiero Piscina Irgas), which first walks over an iron bridge and then climbs steeply. We reach the plateau and have an impressive view of the granite basin of the Rio Oridda with the almost 40m high waterfall. We stay on the sometimes unclear path to the southwest and finally come down pathless left into the streambed of the Rio Oridda.

Tour: (machine translated)
We walk in a kind of granite tub to the first rappel. After a few more steps, the high waterfall awaits us. Then it's back to walking until the last major step. After this, descend along the edge of the stream to the exit on the left bank of the path that crosses here.

Return: (machine translated)
On this we come back to the Rio Cannisoni. Next to the broken metal footbridge we cross to the other bank, where our car is parked.

Automatisch importiert von Descente-Canyon.com für Canyon Oridda Petit filet d'eau grâce aux pluies de la veille. Vasques sombres mais propres. Équipement ok. Très joli, la marche finale est un peu longue et pénible. Belle vallée pour bivouaquer (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21751/observations.html)
