Summary: (machine translated)
Beautiful waterfalls in the rainy season and very little known in the natural park of Aiko Harria. A rather dressed, granitic terrain, between beeches and jungle vegetation, at times encloses a couple of beautiful vertical waterfalls and a multitude of small slides, skills and areas to ensure that we do not take a culetazo.

Hydrology: (machine translated)
Yes, on the slopes

Access: (machine translated)
We will have to go to Oiartzun and from here take the GI3631 road that takes us up to the top of the park. We will be able to park in the conditioned parking lots in the p.k. 12 and 13 for the access car.
If you have a return car, you can leave it at k.p. 8 in a widening of the road where there is a track that will be your return.

Approach: (machine translated)
Northbound from the parking lot at km. 13 down to the riverbed

Tour: (machine translated)
A first class environment, the first waterfall is amazing, the second one is less interesting, then there are sections with small slides, some insurmountable/rappelable slopes to reach the final part with the last two waterfalls, very, very aesthetic.

Return: (machine translated)
After a few meters we reach a track, see map to see the option with a single vehicle. With two vehicles we would continue along the track on the left orographic descending until we meet the road.
