**Specialities:**

**Gear:**

**Summary:** (machine translated)

O del río Cabanas is a canyon with a lot of slope but without spectacular rappels, they are all ramps and the environment is not really well modeled. Better after rains to ensure a good flow.

**Hydrology:** (machine translated)

Yes, both on the road and on the slopes with care.

**Access:** (machine translated)

Getting to A Pobra de Tribes

We will take the CV65 to Montefurado for 9 kms until the hydroelectric power station of Pontenovo, where we turn left and go up to Navea.

**Approach:** (machine translated)

We leave Navea continuing along the road and after 100m we have a path on the right, it climbs above Navea (it takes us backwards) to take another path further up that goes west and leaves us at the head of the ravine.

**Tour:** (machine translated)

Two parts, the first part better configured up to the road, the second part less aesthetic, much better if we descend it with good flow.

**Return:** (machine translated)

After the last climb, we will be attentive to the path that leaves to our left and takes us directly to the village.
