Summary: (machine translated)
Dam with water drainage directly at the entry (risk low); during our ascent very clean water; beautiful limestone; 1-2 slides; very short canyon; worthwhile in combination with other canyons in the area or ideal beginner's tour, very well equipped; is often commercially walked; exposure S.

Hydrology:

Access: (machine translated)
From Belluno on the SS51 towards Longarone. Before Longarone, follow the signs for Pordenone. Cross the bridge over the river Piave. After the bridge, turn left towards Erto, Claut (SR 251). Ride up the mountain road past Erto to Claut. At the end of Claut (after the soccer pitch and the "K2" bar), cross the bridge over the Chiadola. There is a large parking lot on the right (+ nice picnic area near the streambed).

Approach: (machine translated)
From the parking lot, walk down to the picnic area. Here you can already see the wooden signs with the canyoning sign. Follow the path on the orographic left side of the stream and then climb briefly up to the houses and the bridge that is already visible. Here, right by the bridge (small climbing garden), climb up again briefly until you are in front of the dam wall. Entry at approx. 660m.

Tour: (machine translated)
The Chiadola is a very short but well worthwhile lime canyon that is perfectly set up. The seven abseiling points follow each other for a short distance of up to 20m. If the water depth allows, some places can be slid. Below the bridge is the last and highest abseiling point (20m with shower...). The belay is on the right-hand side and can be reached safely via a fixed rope traverse. If you want to avoid this point, you can get off to the left before the bridge. After this abseiling point, you will soon reach the access path. Exit at approx. 600m.

Return: (machine translated)
Climb out of the stream to the left at the artificial steps and follow the access path back to the picnic area/parking lot.
