Specialities:

Gear:

Summary: (machine translated)
Less known than the Infern, however, it is considered to be more sporty, perhaps the most in the area. It is not as well formed but its intermediate gorge is a delight and technically it will make us have to sweat for a while.
Simple and short approach but the return will be quite long because of the steps of the PR.

Hydrology: (machine translated)
Except in the intermediate zone, almost all the rest could escape relegation

Access: (machine translated)
We must go to Vall d'Ebo to the Infern parking lot.
Access to Infern
From Pego take the CV-712 towards Vall d'Ebo. At pk 8, before the Eco Burro Park, turn left onto a track and follow it for about 3kms until the fork in the track, one kilometer before the Infern parking lot. We will see the OMS sign on our left.
We can also park at Infern and save a few minutes on the way back (which we will have to do at the access).

Approach: (machine translated)
Following the track on the left, we will approach the head of the basin. Here we will see its peculiar entrance corridor

Tour: (machine translated)
A first part with its longest rappel, followed by the fattened area where the trap traps will make us sweat (they have fixed rope) to finish with another more open to flow into the reservoir.

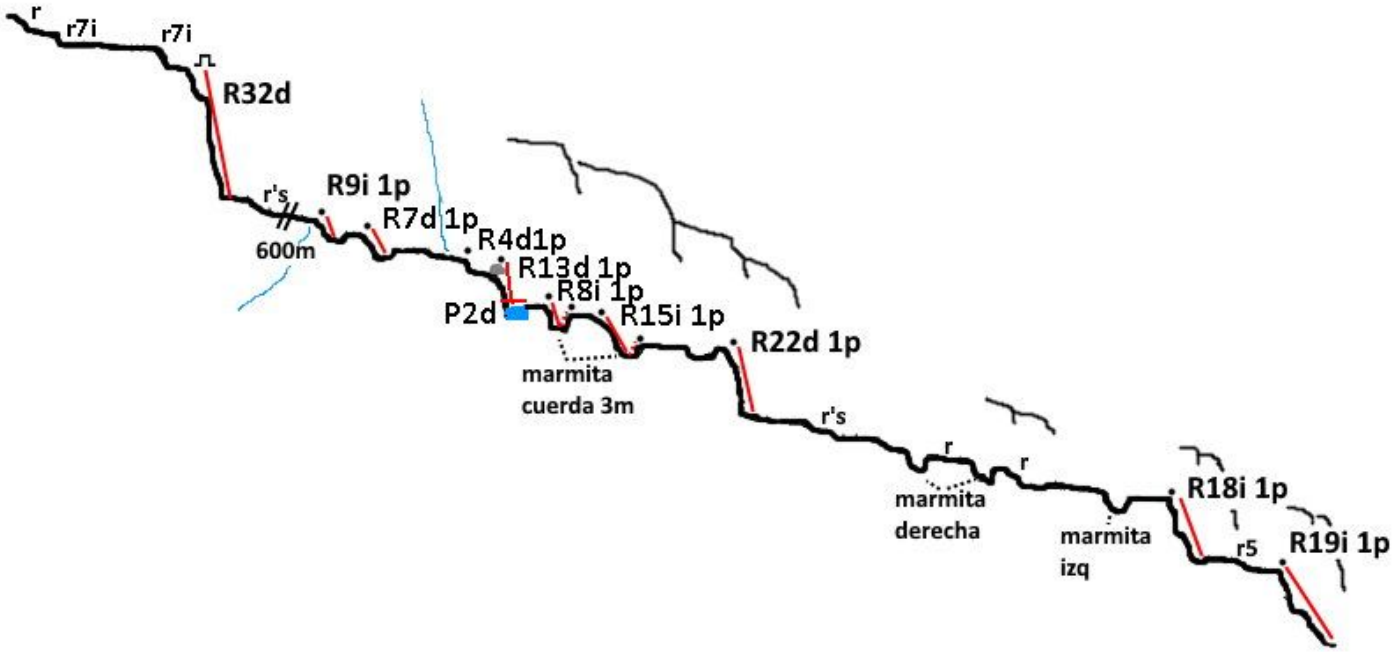

Return: (machine translated)
We will exit to the right at the reservoir to go up to the PR CV 147 (the stairs) where we will go up to the right, with the impressive views of the Salt de Fleix behind us. We will reach the top, Infern parking lot, and follow the track to the fork.
