Summary: (machine translated)
Beautiful quite vertical canyon

Hydrology: (machine translated)
Often impassable until mid-June due to the water level. If you leave the vehicle downstream, you can easily assess the water level.

Access: (machine translated)
Lower parking lot (Parking aval):

On the RN 94 between Briançon and Guillestre. Turn off after Pra Reboul and drive south through the village parallel to the RN94. Park the car about 400 m below the village of Pra Reboul near the bridge. The last waterfalls are visible from the road.
Do not park at the exit on the left side of the river - the owner has a problem with this.

Upper parking lot (Parking amont - shuttle option, 8 km):

With the other vehicle, continue on the RN 94 to St-Crépin. Drive past the cemetery (on the left in the village center, you pass the Beal Noir canyon), then drive up the serpentine road (D 738), through Le Villard and then turn left onto the track that leads to the Guions.
Cross the small village and at the exit, follow the path downhill. Park at the exit.

Approach: (machine translated)
Shuttle bus option: Continue along the path and then take the path on the left towards "Champaussel", the path leads down to the watercourse.
Option without shuttle bus:
From the RG parking lot, follow the path towards ESE for about 100 m, turn left towards the canyon and go around a house on the right. About 100 m after the house, leave the slope and take the path that branches off to the right (cairn, alt. 940m). You reach the canyon, alt. 1050m, and go right (do not go left into the canyon, where the passages are exposed). Long descending traverse until you reach a clear junction on the left (tackle the ascent between the climbing sectors on a very good path). You will reach the hamlet of "Guions", the exit of the approach is identical to the shuttle bus option.

Tour: (machine translated)
The descent begins with a 15-minute walk through the watercourse, then comes the C38. This is followed by C14 RG, C12 RD in a nice basin with a jammed block (not very deep, you're good on foot), then C12 over the jammed block with a deflection. Then C18, C15, C13.

No emergency exit! After the first waterfall, it is impossible to get out of this canyon without risk.

History
First known descent: Michèle VINCENS and the mountain guides Francis ELICHABE and Henri VINCENS before 1990.

Remarks
The equipment is in order.
Facing south-west, little sun (best to set off after 12 noon to benefit from the exposure).

Return: (machine translated)
Follow the RG of the watercourse for 2'.

Surprisingly aquatic and technical, but all very manageable. A worthwhile trip when Freissinieres is too high.
