Summary: (machine translated)
Rappel canyon in mostly naturally cloudy water

Hydrology:

Access: (machine translated)
From Digne-les-Bains on the N 85 a good 10 km southwest towards the A 51 or Sisteron. In Mallemoison, turn onto the D 17, which heads north towards Thoard (13.5 km from Mallemoison). Pass Thoard and continue, first on the D 3, later on the D 117, keeping right at junctions, to Duyes. 600 m after Duyes, we cross the Bramefan. From the bridge, continue uphill for another 2.7 km, passing the entrance to a religious sect ("Communauté de l'Esclache"). At a sign ("Circuit des Brigands"-"Site des Tidalites") we turn left onto a dirt road, which we follow for about 400 m to its exit. Here you can turn around and park.

Approach: (machine translated)
We take the path that joins the slope, walk uphill first towards the canyon and later along the top of it. Then we take the path that leads down to the stream on the left.

Tour: (machine translated)
The stream has hardly any water in midsummer, but turns a dirty brown color after rainfall (photos). Nevertheless, a visit is recommended, especially when other canyons in the region are carrying too much water. Permitted from May 1st to November 20th from 10 am to 6 pm.

Return: (machine translated)
Where the canyon exits (after the 17 m ropes, a longer downclimb and run and a final 4 m ropes), leave the stream (Steinmann) and follow the tracks that lead into a wooded hollow, which is bordered by a rock face to the south (pay attention to this during access!).
Where the clear tracks exit at the head of the valley, do not climb steeply up to the right, but continue left and then up onto the left (northern) ridge, where you will come directly to the parked vehicle (without a path).

Coordinates:
Canyon Start 44.2023 6.1567
Canyon End 44.1981 6.1574
Parking Entry and Exit 44.1965 6.1694
