Summary: (machine translated)
Narrow canyon, but not very deep. Further upstream there is another short gorge (Krottenbach I). The gorge described here was not secured in 2021. We didn't bolt it, but made do with anchors in nature (trees and the like) to give the canyonists following us the feeling of a first ascent.
The tour can be continued in Krottenbach II (see there).

Hydrology:

Access: (machine translated)
From Bad Tölz via Lengries to Sylvensteinspeicher. 200 meters after the bridge over the lake - approx. 100 meters before the signposted turn-off to Fall - turn left, continue straight on through the forest to the hiking parking lot for the Bächental to the left of the road.

Approach: (machine translated)
Continuing along the forest road, we pass the barrier and head towards the bridge over the Dürrach: after 1150 m and 250 m before reaching the bridge over the Dürrach, we turn off onto a half-right track in the direction of the Tölzer Hütte. We follow the forest road for almost 3 km. Then the road takes a sharp bend to the right uphill, but we keep straight on here. After another 600 m, a dirt road turns off to the right to a mountain pasture (4.7 km from the car). We can also get here by bike if we want to get off before part III.
Now continue on foot across some feeder streams, past a wooden footbridge. From now on we keep our eyes open and see the gravel bed of the stream to the left of the forest path - entry.

Tour: (machine translated)
see photo album and video

Return: (machine translated)
After the canyon has widened, we look for the exit on the left slope up to the road if we don't want to add part III. By bike back to the parking lot.
