Transport:	**Rock type:**	**Drainage area:** km²
Season: June - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Fast and aesthetic descent with 3 beautifully formed waterfalls. Perfect to combine with the Ossèse Superieur or the Cascade de Calie.

Hydrology:
– TODO –

Access: (machine translated)
Cascade de Calie, Ossèse Inf and Ossèse Sup
We have to go to the parking of the Cagateille circus, for this we arrive at Saint Girons and go up the Salat river until we reach Oust and by the D3 we pass by Seix and Moilin Lauga until the detour (on the left) to Ustou by the D8. Pass through Le Trein and turn right on the D38 to St Lizier and continue to Stillom. At the bridge that crosses the river to Cagateille we must continue straight on to Ossèse. Park on arrival.

Approach: (machine translated)
Cascade de Calie, Ossèse Inf and Ossèse Sup
We follow the road towards the Marterat pass. In ten minutes we will reach a forest and a hundred meters further we will see a metal fence in poor condition. We turn right to the river.

Tour: (machine translated)
The first two rappels are descended outside the waterfall on the left bank. Then we reach the technical part with two chained rappels in the strait. If we see that there is too much flow we can go to the right bank and continue to a tree above the waterfall from which you can rappel.

Return: (machine translated)
After the tributary on the left we will see a wall, we go out on the right towards the access road.
