#### Specialities:

## Gear:

Ropes: 2x70 m

# **Summary:**

The "Turcinu Mare" Canyon is a technical canyon with a considerable flow. The tallest waterfall is 65 m, and navigating it in high water conditions is a real challenge.

## Hydrology:

You cannot judge the flow from the lower parking, a water pipe takes almost all the water 2/3 of the way down. You have to do the walk in to see the flow.

## Access:

5km shuttle on a bad gravel road, needs a SUV.

## Approach:

Long uphill hike (with lovely views higher up) and long approach along a tree strewn river bed.

#### Tour

A beautiful central waterfall, where it is important to find the re-belay - well to the side on river left. All the water disappears 2/3 of the way down into a water pipe.

### Return:

Immediate. Final waterfall ends by the road.

## **Coordinates:**

Parking at Exit <u>45.3689 23.7991</u>
Parking at Entry <u>45.3798 23.7806</u>
Canyon Start <u>45.3772 23.7980</u>
Canyon End 45.3691 23.7986

Lovely views on the hike. A beautiful central waterfall, where it is important to find the rebelay - well to the side on river left. Other than that it is a huge amount of walking, trees in the water course and minor rappels for one or two good features. We added a bolt below the pipeline and a tree anchor for the final waterfall.
