Summary: (machine translated)
In each case 2-3 rappels in the upper reaches, then a hike along a sintered streambed. Jumps and slides.
The canyon should be visited in spring or after (heavy) rainfall, as there is no water flow in summer.

Hydrology:

Access: (machine translated)
From Ainsa.
You could also make access easier by shuttle, but 22km of shuttle and a less interesting descent in the Rio Sieste to E1 make this alternative unnecessary in practice. If you don't want to be put off by this, you can read more about the transfer in "Senderos de Agua del rio Ara" on page 85 bottom right.

You can also climb up the canyon itself, but then you won't be able to avoid putting on your wetsuit.
Where you reach the confluence of the two spring streams at Poza Chinchirigoy - here at the latest you have to swim - you can turn right (= orographic left) up to the entry into the left spring stream (E2) and from there continue on a path to E1. Or you can go up the right-hand spring river, keeping left, directly to E1 and overcome the double waterfall "Coño del Mundo"-"Cascada del Confesionario" via a via ferrata on the orographic right-hand side.

Tour: (machine translated)

After an entry via E1 or E2, you can continue downhill directly at the confluence of the spring streams or you can combine the two spring streams, as at * https://www.wikiloc.com/canyoneering-trails/barranco-san-martin-y-su-afluente-el-barranco-fondo-inguru-abentura-9329045 . The latter can also be seen in the youtube video: https://youtu.be/0LY-qS3OvFg

Return: (machine translated)
After the last basin of the "Pozas de San Martin" turn left up to the approach path and back to the car
