Specialities:

Gear:

Summary: (machine translated)
Open ravine, usually dry in summer. It can be a good place to start.

Hydrology: (machine translated)
Yes for most of the route

Access: (machine translated)
We must be located in Ademuz.
We will look for the asphalt road/carriageway that takes us to Val de la Sabina and Mas del Olmo. We will pass the Val and a couple of kilometers before the Mas del Olmo we will cross the ravine and we will see the detour to the right to the recreational facility "Molino de los Cuchillos". A few meters before there is another track that goes into the fields, we get in here and a little further on we park the access car.
If we do not have the return car, we park it in the recreational area.

Approach: (machine translated)
We go down to the riverbed and follow it to the rappels.

Tour: (machine translated)
The first part is very open and uninteresting until it drops to the Rambla de Val, where we have 6 rappels.
It is assumed that you can leave to the right to go up where we can or left to the recreation area, although it is difficult.another option is to cross the Rambla de la Val, and climb up looking for the best place, to return to find the track abanadonada that will take us to the car.
