Summary: (machine translated)
Not as much fun potential as its neighbor Richiusa, therefore relatively little frequented. At least some slides and possible jumps and a nice narrow passage.

Hydrology:

Access: (machine translated)
We head for the village of Bocognano on the N193 (Ajaccio - Corte). Either about 40km from Ajaccio or about 41km from Corte over the Col de Vizzavona (1183m above sea level). At the eastern exit of the town, we follow the sign "Richiusa" and take the small road downhill in a northerly direction. After 950m we turn left downhill a few meters before reaching the hamlet of Busso and after another 700m we arrive at a small electric plant on the bank of the Gravona. Here we park the car.

Approach: (machine translated)
Cross the Gravona to the northern bank and, keeping to the right, follow the path in a northerly direction. After about 250m, at the fork, take the path that descends to the right, cross the Cardiccia/Richiusa and climb up the slope on the other bank for about 25 minutes. At an altitude of about 800m, the path branches again. To the left (N) would go to Bergerie Matone and thus to Canyon Richiusa; we go to the right for about 500m (about 25 min.) and then at a suitable point descend without a path to the right into the stream.

Tour: (machine translated)
Downclimb in the open streambed, some slides, then the attractive constriction with rappel.

Return: (machine translated)
after the exit of the narrows about 10 min. march in the streambed to Gravona, then in and on the edge of Gravona another 30 min. to the parking lot on the left.

Automatisch importiert von Descente-Canyon.com für Canyon Leccia Rossa Gros débit +. Le canyon n'est pas équipé pour un tel niveau d'eau. Il faut être très à l'aise dans l'eau vive et ne pas avoir peur de passer la tête sous l'eau... De nombreux toboggans ont des mouvements d'eau importants ou des siphons. Le retour dans le ruisseau est très long par cette quantité d'eau. À noter que nous avons laissé deux sangles en place sur des arbres pour éviter un rappel trop arrosé et impraticable ainsi qu'un toboggan avec un gros siphons. Le canyon doit vraiment être splendide en début correct ! Néanmoins un débit important est à éviter dans ce canyon.Marche d'approche facile à trouver même dans le maquis Corse !
