Summary: (machine translated) Watery Alpine canyon		
Hydrology:		
Access: (machine translated) From Castejon de Sos in the Valle d'Esera, take the A-139 to Eriste (bridge over the river of the same name). 230 m further on, we turn left onto Calle Alta in the direction of Refugio de Angel Orús. The road climbs in many hairpin bends, the tarred road becomes a dirt track. About 3.1 km after turning off the A139, a dirt road leads off to the left to the Puente de Tamarrius. We park the car here for access. Approach: (machine translated) We walk down to the Puente de Tamarrius and take the path there. Access is also possible above the bridge from the orographic right-hand side.		
Tour: (machine translated) See topographic view. Photos and videos		
Return: (machine translated) After about 25 minutes in the open streambed, we climb out to the left at the remains of a canal and reach the car in a few minutes.

Automatisch importiert von Descente-Canyon.com für Canyon Eriste (inférieur) Apparemment, il a été rééquiper récemment. Mais l'équipement de la grande cascade au milieu de la 1ere étroiture nous a fait réfléchir pour l'accès très glissant au relais suivant en hauteur en RG (escalade un peu engagée) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21409/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Eriste (inférieur) Journée hold UP comme dirait Romain. Eriste inf enchaîné avec Aigueta de Vall en GD+ et juste avant les premières gouttes de la tempête annoncée. Attention pour Aigueta de Vall, équipement plus que minimaliste surtout pour ce débit.
