Canyon length: 230m	**Highest rapell:** 20m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: September - May	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Simple ravine, with a lot of undergrowth and that we will have to return by the same facilities or look for alternatives such as leaving by the Riera Seca and have a car there, but that area is private property of the plant...
Collecting except after heavy rains in which it can be something more striking.
The best is the Cueva Bonica

Hydrology:

Access: (machine translated)
We are in Castelldefels heading south.
We will go up to Garraf and park in Pla de Querol.

Approach: (machine translated)
Along the track that goes to the Avenc del Llambrics (to the north), to the dolmen and then to the NE to the Pla de les Basses where we take a small path to the east that takes us down to the riverbed.

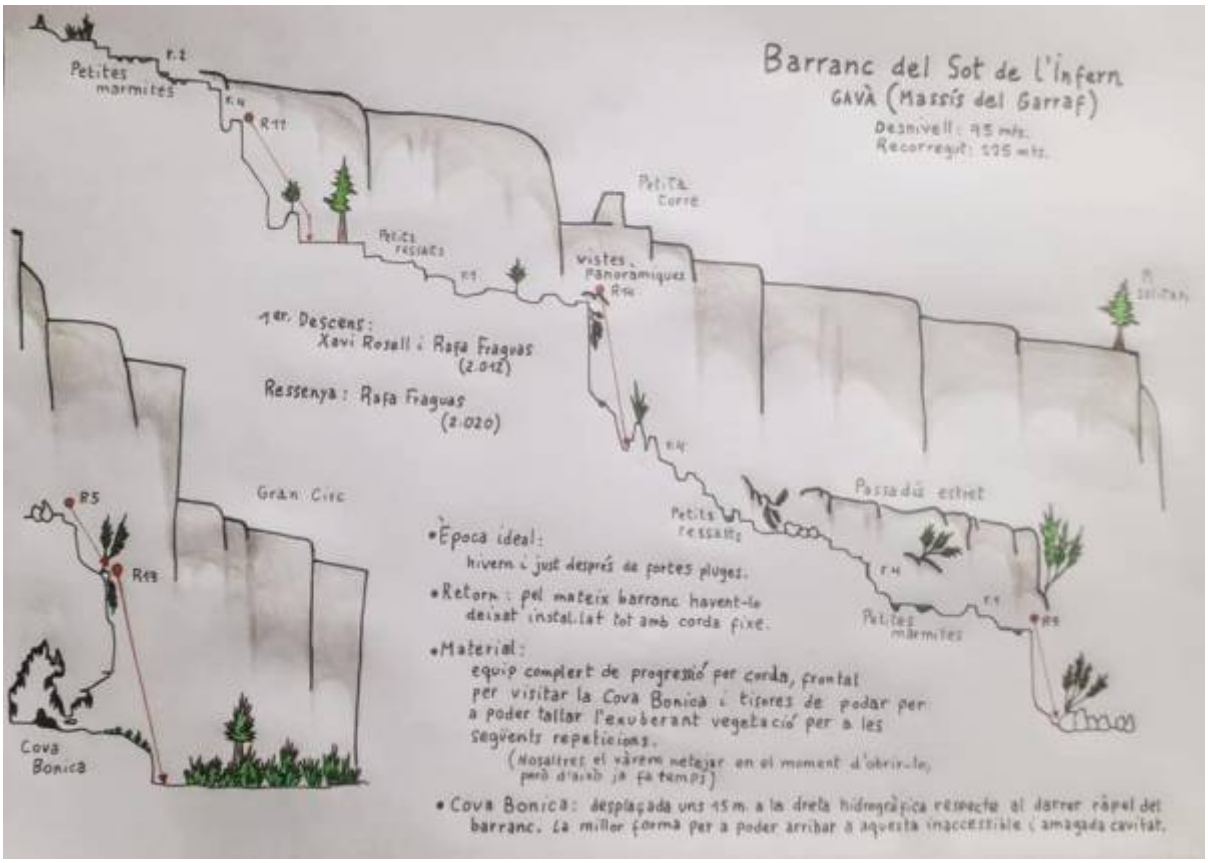

Tour: (machine translated)
See topo.
After the descent we will have to turn right to see the Cova Bonica.

Return: (machine translated)
Going upstream, we will have to leave the ropes in fixed.
Option to study, follow the riverbed and go down the stream outside the private property... to study...

Coordinates:
Canyon Start 41.2820 1.9085
Canyon End 41.2908 1.9394
