Country: France **Region:** Occitanie **Subregion:** Pyrénées-Orientales **Town:** Amelie Les Bains Palalda		
Difficulty: a little difficult	**Grading:** v4 a3 III	**Total time:** 2h35
Approachtime: 30min	**Tourtime:** 2h	**Returntime:** 5min
Altitude entry: 610m	**Altitude exit:** 520m	**Delta Altitude:** 90m
Canyon length: 800m	**Highest rapell:** 22m	**Amount rapells:** 5
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:**	**Best Time:**
Rating: ☆ 3 (2)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x30m (1x40m/1x20m)

Summary: (machine translated)
Dark pools; jumping only conditionally recommendable because underground not visible; in the whole canyon very slippery rock; very rich in vegetation; exposed standings; rope retrival partly difficult; beautiful gneiss rock; very narrow access road.

Hydrology:

Access: (machine translated)
From the village of Amelie-les-Bains at the height of the sports field strong left bend towards Mas Pagris --> follow the long narrow winding mountain road until the fork in the road --> continue right towards Mas Paris (D536) --> even narrower and more winding road next to a deep canyon --> when you reach the village (few houses) drive up to the bridge that crosses the stream --> here you can park on the left (approx. 500Hm).

Approach: (machine translated)
From the bridge follow the road for about 50m --> before the house (left side) turn right up the steep forest path (= shortcut of the road) --> at a fork in the road turn right up to the road --> follow this road for about 400m --> from the road you can already see into the canyon (22m waterfall) --> at a prominent left bend there is a post box and wooden sign 'Le Fargasso' --> here turn right down the narrow path to the stream.

Tour: (machine translated)
Entry at approx. 610m --> at the beginning you will immediately notice that the canyon will be very slippery --> due to the vegetation and partly shady places, a lot of algae and moss accumulate on the gneiss rock --> after a short walking passages there are some passages to climb around (slide) --> soon comes the first and highest rappel point with 22m (left or right) --> after the rappel there is another slippery passage with 10m (right). (left or right) (!!! very slippery but belay to belay possible) --> after the pool there is another slippery passage which can be downclimbed 10m (right) --> downclimb and (slide over rock 4m) --> pool --> C14 (right) (!!! this place can be very tricky if there is a lot of water); 1. Possibility: rappel in the water, the following chute can be walked or slid (very slippery, large dark pool) 2nd possibility: the first person skillfully rappels right above the water over the rock and stretches a rope slide --> then you can jump into the pool (difficult rope retrival!!!!) --> some walking and climbing passages with flat slides and large rock chaos that can be bypassed or downclimbed --> C14 (right) with overhang in large pools --> then climbing passages again over large rocks (can be bypassed on the right side) --> approx. 20m swimming section --> exit left before the dam wall with water channel (approx. 520Hm).

Return: (machine translated)
If you follow the water channel, you will come to a private area and the bridge/exit point after about 5 minutes.

Coordinates:
Canyon Start 42.4378 2.6698
Parking Entry and Exit 42.4412 2.6734
Canyon End 42.4413 2.6719

Automatisch importiert von Descente-Canyon.com für Canyon Terme (sup) Il faisait plus froid qu'hier, et pour monter c'est une mission !! 1h de marche largement en plus, et un habitant étonné de nous voir apparemment, je voulais lui demander où ça en était mais il avait l'air d'avoir froid on va dire.. Gros débit et on s'est gelé par rapport à avant-hier !! Au départ le premier truc, c'est pas pour les petits, après topInfo, la semaine dernière, je l'avais pas posté, mais on a fait aussi le Salt Maria Valenta, en débit pareil assez petit mais puissant, jet fort, et très froid. Toujours aussi beau les canyons d'ici et ça rappelle des souvenirs :) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/234/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Terme (sup) L'accès au sentier de descente historique officiel n'est plus disponible (2 panneaux propriété privé). Il passe par la propriété privé du mas de la Fargasse. Passant la nuit au Mas de la Fargasse, nous sommes initialement descendus par ce sentier avec l'autorisation des propriétaires qui reste l'unique tolérance. Après explications prises auprès des propriétaires, de nombreuses incivilités et agressions physiques des groupes pro de canyons a amené à cette décision. Automatisch importiert von Descente-Canyon.com für Canyon Terme (sup) Vu en montant pour un we escalade au roc Saint-Sauveur. Débit moyen + et Mondony dans son petit débit moyen mais bien, même le petit affluent du Mondony qui arrive de Can Felix coulait encore :) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/234/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Terme (sup) A pied sur l’éboulement, quelle honte cette route ! Beau départ, débit correct +++. Portail fermé du Mas Pagris pour la sortie, continuer dans l'eau, un peu fastidieux.. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/234/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Terme (sup) Parcouru avec Kevin et je rejoins son commentaire débit +++ actif impossible sa poussait fort mais toujours en très beau canyon. Ne pas oublier qu’avec l’éboulement de la route les marches d’approche et de retour sont bien plus longues. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/234/observations.html)
