Summary: (machine translated)
Short rappel canyon in gneiss

Hydrology:

Access: (machine translated)
From Ripoll via Ribes de Frezer on the GIV 5217 towards Queralbs. About 1 km before reaching this village, take a sharp left turn to the right, cross the bridge and immediately after this turn left and follow the orographic left bank of the Riu Freser into the valley. We reach the signposted parking lot and park our car here.

Approach: (machine translated)
We continue on foot. Passing a power station building, we cross the Freser on a wooden bridge. We follow the path further up the Frezer. After a while, we see the 40m waterfall at the top left and "SALT DEL GRILL" written in red on a rock face
Orograf. On the left, a few meters up the stream, then we cross to the other side of the stream and follow the trail that leads us upwards. We cross a ridge, then descend to the stream. We path under a steel cable stretched across the stream.

Tour: (machine translated)
First a 15m rappel, then downclimbing in the streambed, partly supported by short knotted ropes. After a 10m rappel, the 40m drop. Then back down along the stream, via our access path and on to the rock edge 20m above the Riu Frezer. After this rappel, the exit is over.

Return: (machine translated)
We now walk downstream until we find one of the clear exits on the righthand side of the river, which takes us back up to the access path. Now back to the car on our access path.

All stands ok, suitable water flow, early exit from Riu Freser up to the approach trail. Good to connect with Nuria if still time or instead of Nuria if the too much water. (machine translated)
