Summary: (machine translated)

To combine with the ferrata and any of Pandillo's other descents.

Hydrology: (machine translated)
Yes, in several parts of the route.

Access: (machine translated)
Access to Vega de Pas area
We must arrive to Vega de Pas. From the N623 in Entrambasmestas we will take the CA263.
When arriving at Vega de Pas we will turn off by the CA630 to Pandillo.
Aguasal, La Coteruela, La Capia and Ruyemas ravines.
We will park in the village

Approach: (machine translated)
Accesses Aguasal, La Coteruela, La Capia and Ruyemas
From Pandillo, we continue along a path that takes us to Estribera, cross the bridge over the stream and turn right following the PR-S62 (Miradores de Valnera) that leads us parallel to the stream, until we reach a fork which we take to the left up a path that takes us away from the stream leading us to the Cerro de la Vara. Once we reach the highest point, we will continue straight ahead maintaining the altitude until we reach the stream of Ruyemas where we will begin the descent.

Tour: (machine translated)
We begin the descent with a succession of small rappels that lead us to the head of the fifth rappel, the 45 m drop. After this jump we have a small rappel (avoidable) that leaves us at the head of the second large waterfall where we will make a first abseil of 12 m, leaving us in the vertical of the last abseil of 45 m. We have two meetings, one near the active that in case of abundant flow can be complicated having to arrive secured from the previous rappel, and a second meeting to the right more separated from the active and less complicated than the previous one, however both are exposed meetings.
After the big waterfall we will have another small rappel and followed by the tenth rappel of 38 meters (last of the 3 big waterfalls). From here the descent loses interest where we must overcome two rappels and several projections to reach the end of the descent where we will find a path on the right bank, which we will use to return.

Return: (machine translated)
Follow the path that runs parallel to the river and leads to Pandillo.
