Summary: (machine translated)
Typical Ticino tour, but beware, you have to place a (at least) 30m rope at the exit of the canyon in advance so that you don't end up in the Isorno.

Hydrology:

Access: (machine translated)
Drive into the Onsernone valley and then park at Loco.

Approach: (machine translated)
At the bridge, an orographic path on the right leads up to the start.

Tour: (machine translated)
At the beginning of the tour there are still a few exit options, but from the altitude of 520m you have to go all the way to the exit.

Return: (machine translated)
After the rope ascent, follow the ridge until you are back in the village. You can walk through the well-maintained grounds (simply open the gate).

All stands OK. Little water today, so the water was never a problem. Unfortunately, there was always garbage in the river, otherwise clear, deep pools, but unfortunately hardly any jumps or slides possible. Better to use a 40m ropes to get out. Exit also possible via Isorno (upstream with 2 moderately difficult bouldering spots) at normal water levels. This saves you having to install the exit rope. (machine translated)
