Specialities:		
Gear:		
Summary: (machine translated) In the gorge of the same name hides this beautiful ravine that except for rains does not usually carry water. Beautiful final abseil over the tunnel of the road with arrival to the Cinca (caution with the flow).		
Hydrology: Difíciles		
Access: (machine translated) We are located in Ainsa (N260), we will take the A138 towards France through the Bielsa tunnel. After a few kilometers we will pass Labuerda and at pk57 we arrive at Escalona. We will continue towards France, we will pass Lafortunada and we will face the entrance to the Devotas gorge, right next to the tunnel there is a place to park.		
Approach: (machine translated) We will return along the road for about 300m and we will see a path on the right side that goes up the slope towards the hermitage of San Sebastián.		
Tour: (machine translated) Nice descent that is gaining in substance until the final rappel over the Cinca. Be very careful on this rappel with the friction and if the rope gets into the crevasse it would be impossible to recover it.		
Return: (machine translated) We go up to the road and cross through the old tunnel to the parking area if the flow of the Cinca is weak. If not, we will go up to return by the road as it is.
