| Difficulty: a little difficult | Grading: v4 a4 V | Total time: 12h |
| Approachtime: 5h | Tourtime: 6h40 | Returntime: 20min |
| Altitude entry: 2280m | Altitude exit: 1520m | Delta Altitude: 760m |
| Canyon length: 2500m | Highest rapell: 50m | Amount rapells: 30 |
| Transport: on Foot | Rock type: gneiss | Drainage area: 20.00km ² |
| Season: September - February | Orientation: Southeast | Best Time: 10-16 o'clock |
| Rating: ★ 3.5 (1) | Info: ★ 2 (1) | Belay: ★ 2 (1) |
| Specialities: | | |
| Gear: Ropes: 2x60m | | |
| Summary: (machine translated) Gneiss canyon with lots of vegetation. Good warm-up tour for larger projects. | | |
| Hydrology: (machine translated) Catchment area mainly forest. From October to February, mostly stable weather conditions with little precipitation. | | |
| Access: (machine translated) Drive to Karuwa, you have to redeem the Annapurna Permit beforehand. | | |
| Approach: (machine translated) Walk up to 2400m on the Mardi Himal East Trek. From there, follow a small hunter's trail through the forest to a tributary of Bhalaudi, where you rapel down to the main stream. Better ask for guides, Tanka and Chack should know the way down to the tributary. | | |
| Tour: (machine translated) A few tight spots at the beginning, and cool rappels. Towards the exit a bit more blocks, but some jumps possible. | | |
| Return: (machine translated) Look for tracks on the left, in the Seti valley a large hydro plant is being built, there are some forest roads that are not yet on the maps. | | |
