Summary: (machine translated)
Beautiful canyon, very aquatic because it receives all the water from the lake of Oô. During the summer it is an easy descent without great verticals and with the possibility of multiple jumps and slides.

Hydrology:
Difíciles

Access: (machine translated)
We must reach Bagnères de Luchon from the French side by the D125 or from Spain by the Portillon from Bossost by the N141.
At the exit of Bagnères de Luchon north we must turn left on the D618 towards Arreau and Peyresourde.
Arriving at Cazeaux turn left on the D76 towards the commune of Oô. Cross the village and continue towards Granges d'Astau and Lac d'Oô. At the end of the road there is a parking lot.

Approach: (machine translated)
We will leave by the path towards the Espingo refuge, almost to the Lac d'Oô refuge. At about 1400m altitude there is a path to the right of EDF for a water intake. We will continue until we reach the river

Tour: (machine translated)
A somewhat slippery descent full of small rappels and abseilings until the final zone, where we will have the highest points.

Return: (machine translated)
After the footbridge and the last rappel, we will leave by a path on the right.

Only walked the lower part - access via the path on the orographic left side (approx. 30' from the small bridge) - heavily commercialized - many hanging ropes and bypasses built in - short but rewarding (machine translated)
