Canyon length: 400m	**Highest rapell:** 46m	**Amount rapells:** 7
Transport:	**Rock type:**	**Drainage area:** km²
Season: June - November	**Orientation:**	**Best Time:**
Rating: ☆ 3 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Dry canyon, open and very vertical, spectacular in its development. We will need to combine cars.
Descent prohibited from January 1st to June 30th due to nesting and in wet conditions due to crab breeding.

Hydrology: (machine translated)
In most of the tour, the problem is to leave the circus after the circus.

Access: (machine translated)
We must get to Alcoleja.
By the A7 exit Alcoy and CV70 to Benilloba, we will pass Benilloba and arrive at Benasau. Here, at the exit of the village, we have the detour to the right to Alcoleja by the CV770.
We cross the village and at pk 31.7 there is a track on the left where we go down to the bridge that crosses the ravine and an old mill, here we leave the car to return.
We return to the road and continue towards the Port de Tudóns, shortly before the port, we will pass an old military barracks and soon a track comes out on the left (PR CV 22 - Font de l'Arbre), we go through here and about 3kms later we find a small track on our left, here we park.

Approach: (machine translated)
We go down the new track (at first in the opposite direction to the previous track), the ruined hut / corral, Casimiro, until we reach the riverbed.

Tour: (machine translated)
Open canyon but very vertical and aesthetic, we will not stop rappelling and climbing up to the base of the cirque.

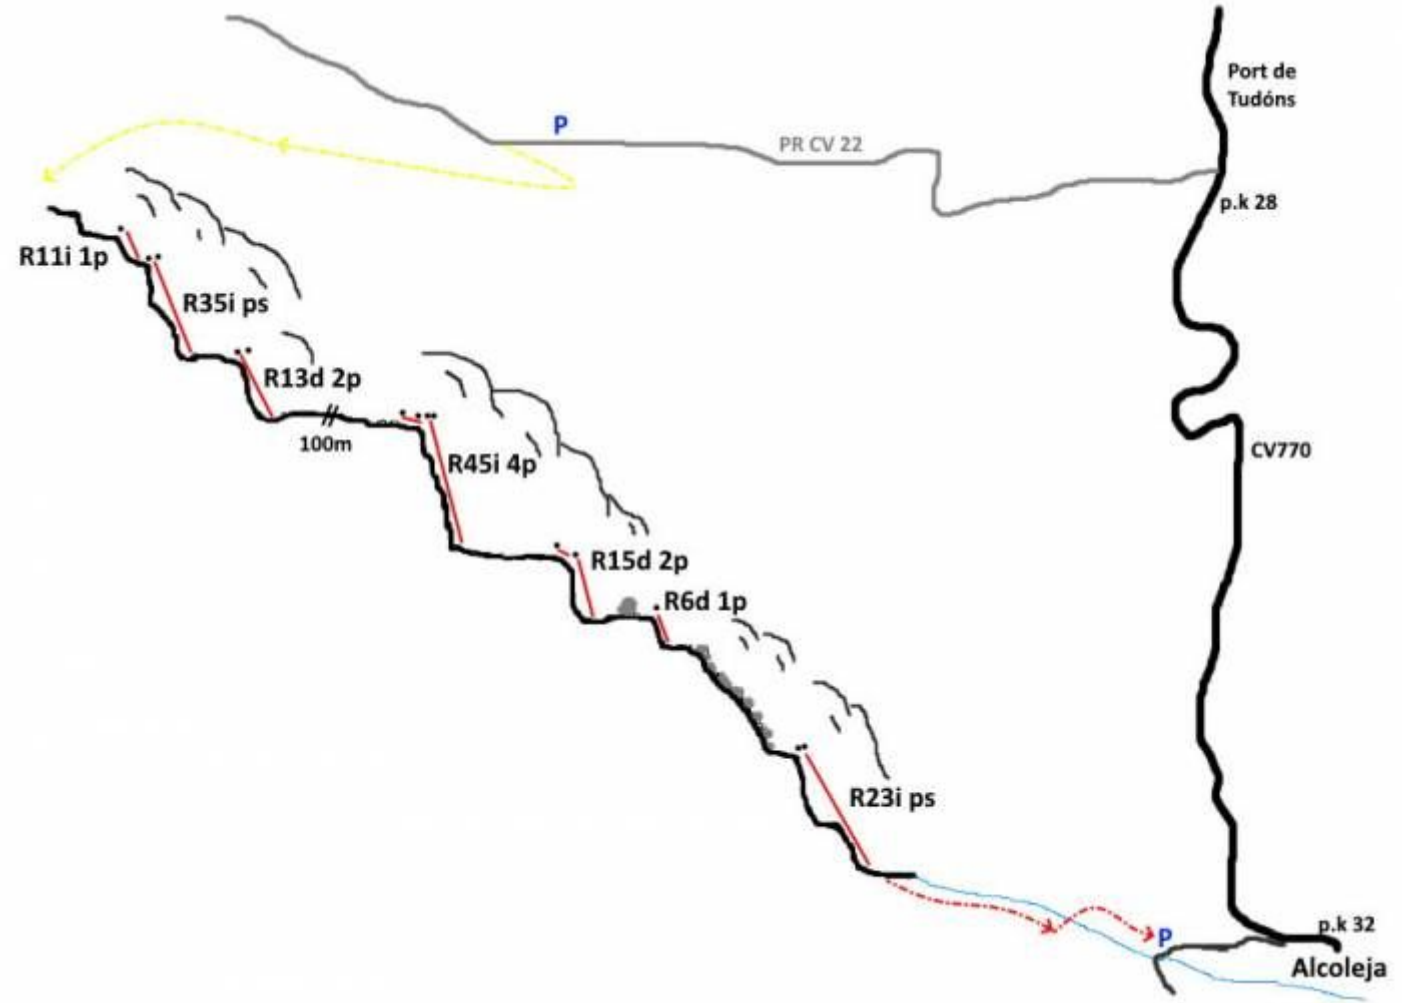

Return: (machine translated)
After the last rappel we will go to the right following the milestones. When we reach the footbridge we cross to the orographic left and follow the path parallel to the ravine that leads to the mill where we park.

Coordinates:
Canyon Start 38.6679 -0.3098
