Approach:

Tour: (machine translated)

A descent with a drill to re-equip everything would not be a luxury; old anchorages +++, poor handling of friction, the C50 has two good RG spits, connected, well placed, then before the C100, take the RG anchorage (2 spits) to descend in the axis (12m) (attention, reform the anchorage with chains you can see + in RG of this anchorage) to the edge of the C100; from there, a mixture of old and new anchors awaits you, which goes a little awry. The relay is 50m further down, slightly to the G on a good ledge (3 points connected). You can see an exit at the exit of the C100 RD to reach the parking lot for the GR.

Bring your helmet!!! (as always...) lots of stone chips.... and the retrofit kit, because new obstacles can appear depending on the landslide.

Return:

Coordinates:

Canyon Start <u>45.9497 6.6675</u> Canyon End 45.9429 6.6516

Parking Entry and Exit <u>45.9433 6.6526</u>
