Automatisch importiert von Descente-Canyon.com für Canyon Rodokalos Nice canyon, Parked at the gate of the farm, then followed the dirtroad for 100meter and then followed a small animal track to the riverbed. If you want to check the waterflow from the bottom, follow the exit path for 4 minutes, there is a small hiking bridge that goes over the correct waterstream of the canyon. Automatisch importiert von Descente-Canyon.com für Canyon Rodokalos Approche à pied, 1H30/45 en partant du pont (fin du canyon) et par Ypati. Pas de difficulté pour le sentier (suivi sur carte sur téléphone au cas où), marquage rouge/orange de temps en temps. A l'approche du refuge, prendre à droite devant la clôture du refuge, et descendre un sentier évident puis partir sur la gauche (comme pour longer le refuge mais en contre bas). Le sentier reste assez évident jusqu'au bout. Nous avons quitté ce sentier car nous nous sommes fait avoir par de mauvais points GPS trouvés sur internet (ainsi que par une trace GPS que nous avons fini par suivre mais qui n'était pas du tout bonne non plus) et par un descriptif parlant "d'un grand espace ouvert boisé de sapins tout autour" où nous pensions être de façon évidente en arrivant alors que ce n'était pas le bon espace. Il faut donc rester sur le sentier initial. Si vous vous retrouvez à crapahuter dans des branchages désagréables, vous n'êtes pas au bon endroit, il y un "vrai" sentier jusqu'au départ du canyon (on le distingue moins en arrivant dans la clairière en contre bas du refuge mais il réapparait plus haut). Il faut juste quitter ce sentier à la toute fin pour suivre une trace « évidente » qui rejoint la rivière qui n’est qu’à quelques dizaines de mètres du sentier de randonnée. Sinon très sympa comme canyon, équipement en bonne état. Débit assez faible mais juste satisfaisant. Fait en 3h à huit personnes.Nos coordonnées GPS du départ :38,8522000, 22,2437000Ou38°51′07.92″N 22°14′37.32″E (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21468/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Rodokalos Did the full canyon with a car shuttle. The road to the top is okay with an SUV. All equipment is okay, it is a pretty canyon. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21468/observations.html)

Make sure you do it. The path up from the village is very easy to find, but not so easy down to the canyon. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Rodokalos Gros débit - All ok with this waterlevel. C30 Waterfall there is a little "Via Cordata" left side to go down without watercontact.We walked up the well-marked hiking trail above the church. Once at the top with a view of the refuge (1h), turn right at the corner of the fence and walk down the red/pink marked path until you come to a fence with a sign again. Turn left there and follow the path until you come out of the trees. From there, look for a path diagonally left down towards the stream (20 minutes from the corner of the fence).Unfortunately, the refuge has fenced everything off, so we take this detour.From the bridge next to the parking you can see the last waterfall. When you walk 3 Minutes the way-back-path until a little bridge you can check a little bit the waterlevel...Very beautiful canyon ????
