Summary: (machine translated)
Rappel canyon with narrow passages and little water

Hydrology:

Access: (machine translated)
From the Barbastro - Huesca road (N 240), about 25 km after Barbastro, turn right onto the A 1229 towards Abiego, Rodellar. A few hundred meters after Abiego, turn left towards Bierge. This will take you over the Rio Isuala, which you will later follow up or down in the Estrechos des Balcés. You should make a first cautious assessment of the water level from the bridge. A few meters before reaching the village of Bierge, turn right towards Rodellar ('Bco de Mascun'). 6.2 km after this junction, in a prominent left-hand bend, is the starting point for access.

Approach: (machine translated)
From the bend, you cross a fence and head eastwards onto a large meadow. At the eastern edge of the meadow you come to a track and follow it to the right in a south-westerly direction. It crosses a streambed in a left-hand bend. In the following prominent right-hand bend, a trail descends to the left in an easterly direction to the confluence of two streams (entry). Access path not easy to find.

Tour: (machine translated)
5 rappels; interesting the last rappel to the Rio Isuala, especially a narrow slot.

Return: (machine translated)
Either down the Estrechos of the Balcés (Rio Isuala) to the road bridge of the Bierge Adahuesca connecting road in 2 hrs. 30 min. (then station a second vehicle at the bridge) or upstream to the ascent from the Cueva Cabrito, past the tributaries of the Bcos Torla, Alboceral and Cueva Cabrito - ascent marked with cairns - 50 min. in Estrechos, 1 hour ascent to Coral Alto (then park second vehicle at km 8 from Bierge under a large free-standing tree).
