The Otro is probably the most beautiful canyon in Valsesia, with some spectacular forked sections; it was explored many years ago by an unknown team that equipped it with resinati. Over the years there has been little left of these weapons and now it would need to be retooled; which is not easy because of the always high flow rate that makes entry possible for a short window of time. We entered in the canyon with the intention to explore but found some old bolts and some old webbing... anyway we descended the first two waterfalls and decided not to continue because of the enormous (and increasing) water flow... The first waterfall is something amazingly strong and aesthetically stunning, so we're psyched to come back and finish the descent! (machine translated)
