Summary: (machine translated)
Short and dry but fun canyon at the foot of the Javalambre peak. You can "combine" the ascent with the canyon of the Whale or do it in winter looking for stronger emotions.

Hydrology:
– TODO –

Access: (machine translated)
We must go to Camerena de la Sierra, towards the ski resort of Javalambre.
If we have two cars, we will leave one at the Refugio Rabadá y Navarro, where we have the detour on the way up to the resort or in the parking lot of the Lapiaz sector. The second car will be left in the parking lot of the Sabina sector of the resort.

Approach: (machine translated)
2 cars: we leave from the parking lot of the Sabina sector towards the Javalambre peak, from the turrets and looking towards the peak we can see the ravine on the right.
1 Car: if we leave Rabadá we must go up to the Lapiaz sector. From here by the path of amanaderos towards the peak. Once up, just to the right we have the ravine.

Tour: (machine translated)
It starts with small abseilings to continue with 4 rappels and some more abseilings.

Return: (machine translated)
When leaving the ravine take a right when you see the milestones and look for the usual track up to Javalambre from the refuge. This track leaves us in Lapiaz or in the refuge.

Coordinates:
Canyon Start 40.1086 -1.0241
