Summary: (machine translated)
System of small descents next to the ferratas of the area. Recently opened and installed, they have been named Satellite 4, 5 and 6.
They are canyons designed to make the ferrata and then descend through the facilities created. If you are willing to spend a good day there is time to do them all in a very fun day. Avoid the summer or at least the central hours and foresee anti-rocks.

Hydrology:
Sí

Access: (machine translated)
On the A32 between Albacete and Alicante
We will leave to take the A33 southbound and shortly after the exit of Caudete.
By the old national road that crosses the town to go to take the Vereda de Sta Ana northbound.
At the end of this street is the parking and access to the ferrata Fuente Oliva and Bco Satellite 6, about 200m before we have the detour to the right to go to the Bcos Satellite 4 and 5.

Approach: (machine translated)
The access to Satellite 6 is by the path that goes up next to the ferrata or by the ferrata itself. When you reach the top, turn left following the milestones and orange dots (red for some) to the milestone that marks the head of the route.
The access to Satélite 4 and 5 will be made by the blue-dotted path that goes to the walls in front of us. When we reach the wall, we will follow the points 4 that will take us to the head of Satellite 5 (bco Zoe) or continuing upwards, to Satellite 4.
To chain 4 and 5, we will leave point 4 to the path and continue up to the head of point 5.

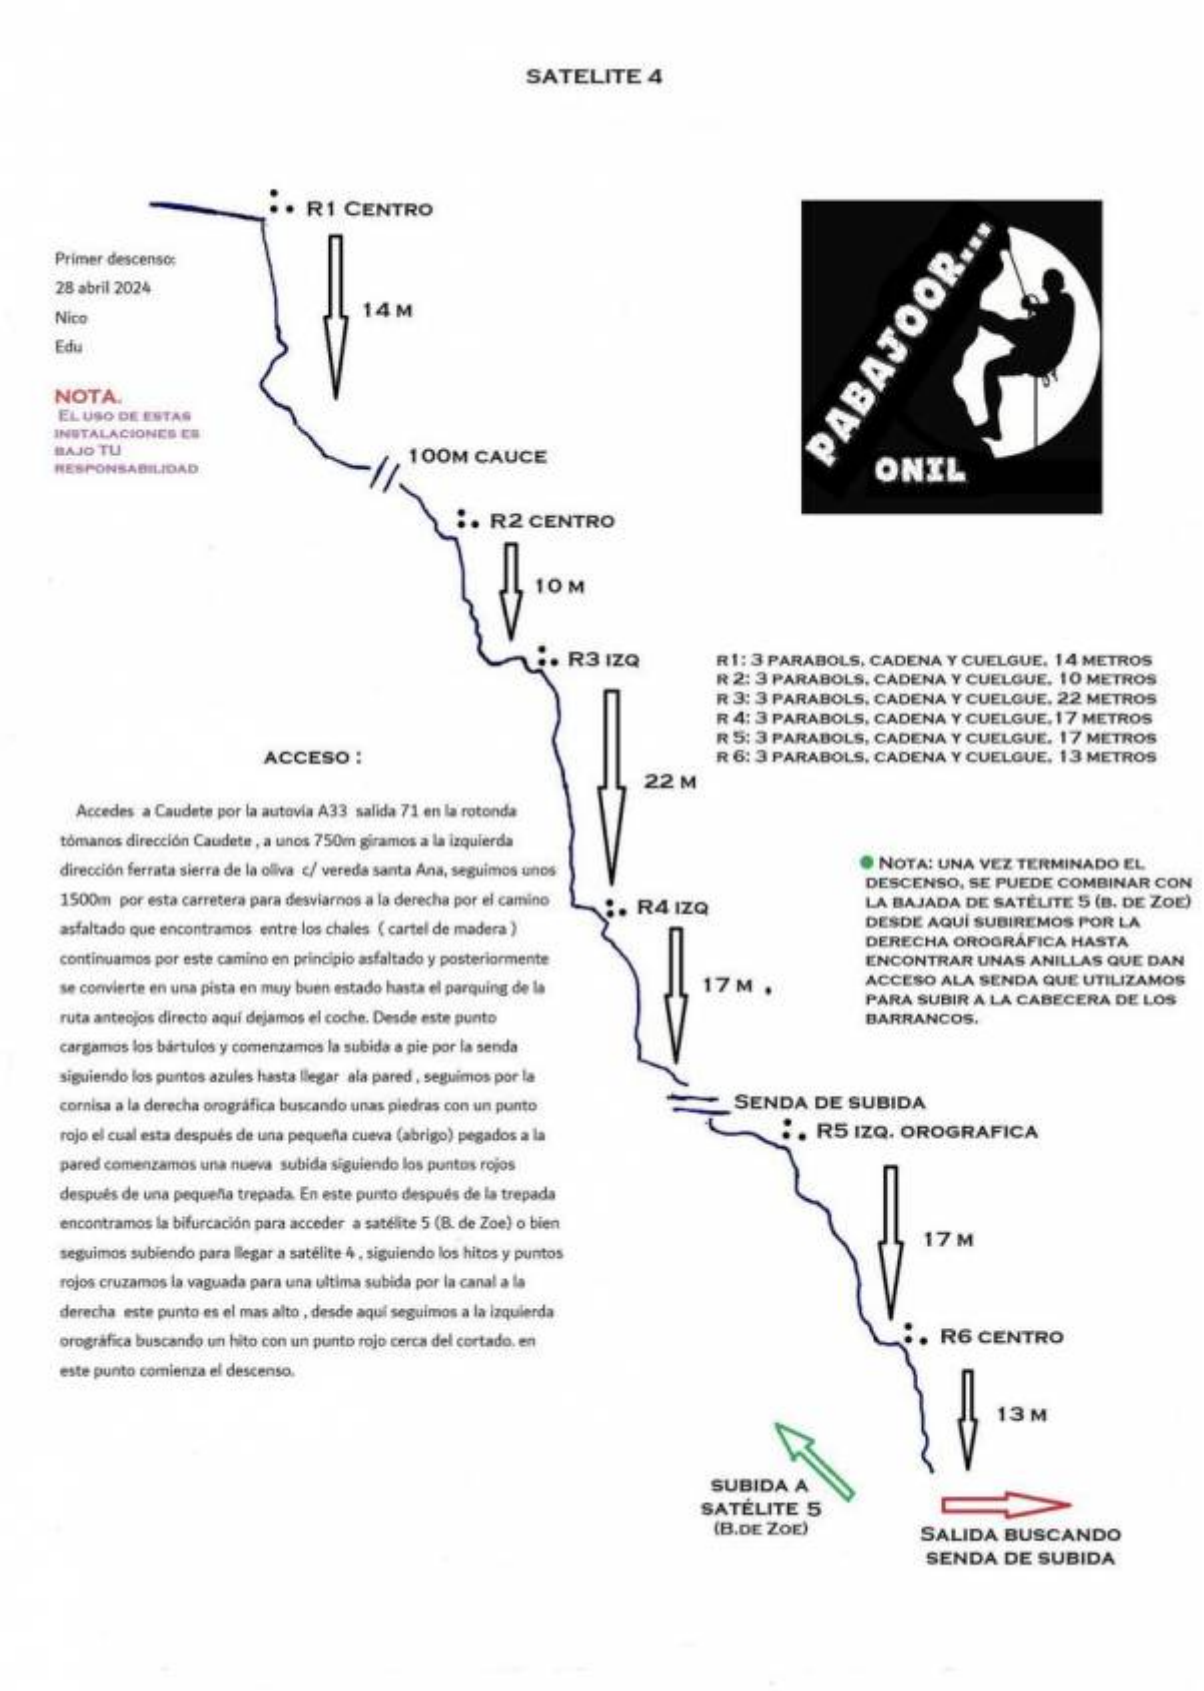

Tour: (machine translated)
See topographies

Return: (machine translated)
Simple in all cases:
* Sat 4, we go out to the right to climb to the access path. We can go up to 5 or return to the parking lot.
* Sat 5, we will continue down in search of the access path.
* Sat 6, we will continue down in search of the access path.
