Specialities:

Gear:
Ropes: 2x20m

Summary: (machine translated)
Simply a great canyon! Narrow, deep, beautiful rock. There is only one prominent rappel in the canyon, about 15m. Everything else can be downclimbed and jumped. In my opinion, this canyon is an absolute must in the region.

Hydrology:

Access: (machine translated)
Coming from Ampezzo, drive towards Sauris. Park at the first prominent leftward haipin bend. (50m further on there is a superiore parking lot, if you don't feel comfortable in the hairpin bends). It is about 3km from Ampezzo.

Approach: (machine translated)
From the parking exit, continue in the direction of Sauris, drive through the tunnels and after a few bends (approx. 1-2 km) you will find a small parking lot on the right-hand side with a signpost on a wooden pole. Park here, the path leads directly from here down to the canyon in about 10 minutes. At a steel bridge, the path goes off to the left immediately afterwards and you are in the canyon in 2 minutes.

Tour: (machine translated)
In the canyon itself there is only one prominent rappel of about 15m, everything else can be downclimbed or jumped.

Variant:
If you only want to do the upper part of the Lumiei after the Novarza, go left through the tunnel at the exit of the Novarza (at approx. 650m).
There are several bolts on the left where you can attach a 20m rope.
After attaching the ropes, go back about 50m to exit the Novarza orographic right at the large rock with vegetation.
Before the small suspension bridge, go right down the path to enter the Lumiei after approx. 5 min. After the 20m rappel, you come back to "daylight" and to the previously attached exit rope.
Climb up here and take the same route as before back to the bridge and then continue up to the parking lot

Return: (machine translated)
After a series of waterfalls cascade into the canyon from the left and trees grow in from the right, watch out for a cairn on a large stone. The path goes slightly diagonally away and is marked in white and blue. Return to the car in 15 min.

Coordinates:
Canyon Start 46.4505 12.7683
Parking at Exit 46.4356 12.7820
Parking at Entry 46.4487 12.7704
Canyon End 46.4406 12.7825

Automatisch importiert von Descente-Canyon.com für Canyon Lumiei Refait après Novarza. Un peu plus d'eau suite aux orages des derniers jours. Ça pousse un peu dans les parties étroites ou de désescalades, mais sans danger. Les rappels sont hors d'eau. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21725/observations.html)

Telephone information about the maintenance office was uncomplicated, we were told that no flushing was planned. Water in the canyon was higher today, especially due to the Novarza. Canyon, as already described by others, sparsely secured! However, there are stands/bolts at the really normal points! It was fun (machine translated)

According to the tourist office in Sauris, the operator of the reservoir no longer wants us to go there and won't give us any information about flushing etc.. I then went up to the dam. There is a maintenance office where there are signs with 2 numbers in front of the door. Someone picked up the second number and gave the OK for the tour. (machine translated)

All pitons OK, the small slides and jumps all work. Exit is well marked (blue dots next to Steinmandl) (machine translated)

Grandiose scenery! Superiore! When describing the exit, you can actually ignore the reference to "trees growing in" and cascading waterfalls and primarily follow the path through the cairn on large rocks. Unfortunately, the blue marking (small) is painted on the back of a small boulder. Telephone information at the dam worked. (machine translated)

Super deep and beautiful canyon! A fair bit of rubbish where it can cling on to pieces or wood or between rocks ◫ Very easy walk in and out, and beers available between!

Wonderful tour with sensational oscuros! :)) Even the view from the bridge at the access point is impressive! The water level is just right, and the lock keeper gave the okay with a few chunks of English that there would be no flushing today. The only stand is a little exposed, better reached with a traverse rope. The positioning makes sense, however, as it is easy to get down next to the stream. Further on there is a slide in which unfortunately there is a huge block in the runout. the downclimb was a bit bad, but not tragic. In general, there were a few places that would probably have an anchor in other tours. Generally a super impressive gorge, and a clear recommendation if you want to know the most beautiful tours in Friuli! (machine translated)
