Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Tarragona **Town:**		
Difficulty: difficult	**Grading:** v5 a1 ?	**Total time:** 2h
Approachtime: 40min	**Tourtime:** 30min	**Returntime:** 50min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 100m	**Highest rapell:** 50m	**Amount rapells:** 1
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
In itself it is a single vertical but it allows us to combine it with the Montsant ferrata and make an approach in a brutal environment.

Hydrology: (machine translated)
Not required

Access: (machine translated)
We must be located in Morera de Montsant.
By C242 to Cornudella de Montsant and here we turn by TV7021 to Morera. We park in the village

Approach: (machine translated)
We will leave following the signs that lead us to the via ferrata of Montsant. After 1.5 kms we will arrive at the detour, if we take to the right we will go along the VF if we continue straight ahead we will access by the Grau de Sanfores, also a very nice step.
* If we go along the VF, we will climb it and continue to the top where we find a path that we take to the left, we will go all the way up, with good views following the path in a south-west direction towards the Grau de Sanfores. Before arriving we will turn north towards the bed of the ravine. When we get to the bed just follow it.
* If we continue facing the Grau de Sanfores and that goes to the Racó de la Missa, after passing it, the path turns north to pass through the bed of our ravine. Just follow it up to the vertical

Tour: (machine translated)
A single 50m vertical in cantilever, spectacular.

Return: (machine translated)
From the lower part we turn left to the path that takes us back to Gray de Sanfores and from there along the access path to the village.
