| **Country:** España / Spain **Region:** Aragón **Subregion:** Huesca **Town:** Colungo | | |
| **Difficulty:** not as difficult | **Grading:** v3 a1 III | **Total time:** 2h35 |
| **Approachtime:** 35min | **Tourtime:** 1h45 | **Returntime:** 15min |
| **Altitude entry:** 710m | **Altitude exit:** 580m | **Delta Altitude:** 130m |
| **Canyon length:** 800m | **Highest rapell:** 15m | **Amount rapells:** 5 |
| **Transport:** on Foot | **Rock type:** conglomerate | **Drainage area:** km² |
| **Season:** | **Orientation:** West | **Best Time:** |
| **Rating:** ☆ 2.5 (2) | **Info:** ★ 0 () | **Belay:** ★ 0 () |

**Specialities:**

**Gear:**
Ropes: 1x30m

**Summary:** (machine translated)
Varied conglomerate rappel canyon

**Hydrology:**

**Access:** (machine translated)
From Barbastro in the direction of Alquézar. After about 20 km on the newly extended A 1232, turn right at the junction at the Rio Vero bridge (beyond the Camping Rio Vero bridge) and continue on the A 2205 via Colungo in the direction of Arcusa, Ainsa. The road now winds its way northwards. Cross the Bco Palomeras Fornocal and a few hundred meters further on you will reach the Puente de las Gargantas over the Rio Fornocal. Park your car here.

**Approach:** (machine translated)
On the east side of the bridge, a trail first heads north towards the edge of the Sarratana. It soon turns to the east and leads along the edge of the conglomerate canyon, rising only imperceptibly almost to the end of the valley. After crossing a small stream channel, it then descends to the entry point.

**Tour:** (machine translated)
First "Gumpenhüpfen", then rappel, partly in the "Souterrain".

**Return:** (machine translated)
After emerging from the last part, which is almost underground, you reach the Rio Fornocal after a few meters and follow it downhill under the road bridge high above. About 70m after the bridge, a track on the right, initially crossing an old concrete water pipe, climbs steeply up to the bridge (if in doubt, keep to the right). Take the same ascent after the Fornocal and the Palomeras Fornocal.

**Coordinates:**
Canyon Start 42.1937 0.0696
Canyon End 42.1908 0.0601

Automatisch importiert von Descente-Canyon.com für Canyon Sarratanas La pluie de ce matin a permis de recharger le canyon en eau en quelques minutes grâce aux nombreux impluvium. Assez agréable à faire dans ces conditions. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2824/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Sarratanas Je ne pensais pas qu'il soit possible d'avoir une nouvelle découverte de bouse en Sierra de Bouza. Mais si si ici tout est possible : la bouse à son paroxysme! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2824/observations.html)
