Create: 2023-03-09 20:53:10	**Update:** 2023-11-20 12:14:44	**Print:** 2026-11-10 02:11:06
Country: España / Spain **Region:** Aragón **Subregion:** Huesca **Town:** Colungo, Asque		
Difficulty: not as difficult	**Grading:** v3 a1 II	**Total time:** 16h20
Approachtime: 15min	**Tourtime:** 15h5	**Returntime:** 1h
Altitude entry: 740m	**Altitude exit:** 600m	**Delta Altitude:** 140m
Canyon length: 1800m	**Highest rapell:** 23m	**Amount rapells:** 6
Transport: on Foot	**Rock type:** conglomerate	**Drainage area:** km²
Season:	**Orientation:** West	**Best Time:**
Rating: ☆ 2.6 (2)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x 30m

Summary: (machine translated)
Rappel canyon in conglomerate rock
Attention: Since the 8 adjacent chutes of the canyons Lumos I,II,II, Alpán I (Medio)u. II and Trucho (left branch of Alpan II) are very difficult to navigate precisely due to orientation problems, it is best to always take 2x25m of rope with you in order to cover all eventualities.

Hydrology:

Access: (machine translated)
From Barbastro in the direction of Alquézar. After about 20 km on the newly upgraded A-1232 at the junction before the bridge of the Rio Vero (on the right old arch bridge - beyond the bridge Camping Rio Vero) right up and on the A-2205 via Colungo continue in the direction of Arcusa, Ainsa. The road now winds curvaceously northward. You cross the Bco Palomeras Fornocal (8.1 km from Rio Vero - bridge) and a few hundred meters further you reach the Puente de las Gargantas over the Rio Fornocal (8.7 km from Rio Vero bridge). The route continues with many bends. 4.9 km after the Puente de las Gargantas over the Rio Fornocal - we are in the meantime on the back between the Fornocal basin and that of the Rio Vero - a runway goes off to the left diagonally. Here we park our car on the open space.

Approach: (machine translated)
We first follow the track parallel to the tarred road to the south. After 260 m it bends to the southwest. Either here or a few meters before, we leave the track to the right and keep left at the top of the cliff above the basin. There are 2 chutes. We still pass the top of the first canyon branch, but then descend the next chute until the growth stops (entry). It is also possible to descend the first and third chute.

Tour: (machine translated)
We walk down the chute to the first rappel (23m). The canyon becomes narrow, descending in heels. Arrived at the bottom of the gorge, we clamp after a short run through the "Oscuros". We pass successively 2 "Sala "s and several more narrows, then comes the running section. Several side canyons come down from the left, finally the somewhat wider one of the Alpan. The canyon now makes a left bend at a right angle. Here (large cairn) we exit up to the right.
One could also "take" the following narrow section and climb out and up to the right after this.

Return: (machine translated)
We reach the ridge above the Bco. and join the path that - starting in Alquezar - now runs up from the Puente Villacantal (Rio Vero). We follow this, finally through some vegetation, up to the track and our car.

Coordinates:
Canyon Start 42.1926 0.0486
Canyon End 42.1851 0.0362
Parking Entry and Exit 42.1962 0.0504

Automatisch importiert von Descente-Canyon.com für Canyon Lumos Beau canyon très encaissé en 1ère partie (ne pas sortir la combi neuve pour cette sortie!!) et de plus en plus ouvert pour la 2nd. Equipement vieillissant mais plus que correct, certaines plaquettes sont bien desserré, si le prochain peut penser à sa clef à momo Pour trouver la sortie, ne pas hésiter à bien continuer dans le lit de la rivière, facilement identifiable RD belle dalle calcaire + gros cairn mais après un peu de marche Vasques bien pleines et petit débit par endroit , au top !!!!
