Specialities:

Gear:

Summary: (machine translated)
Vertical descent almost without water that is better to do in spring or after rains. It is a stream that descends the hillside. Two cars are necessary

Hydrology: (machine translated)
It is quite open, you can escape through the forest with care.

Access: (machine translated)
On the N20 from Foix to Tarascon-sur-Ariège, we take the D8B to Montoulieu.
We continue and soon turn right to Seignaux, at the entrance of the village we park the car for the approach.
Until Amplaing, here we look for the Chemin du communal, at the end of this we park the car to return.

Approach: (machine translated)
We cross Seignaux and follow the marked track of Taus (up to the Roc de Taux) and the Cabane des Gardes. We will reach a sharp turn to the right with a path that continues straight ahead and a panel (chemin de Tournac) we follow it (according to reviews at the height of 890m). Soon we find a stream that cuts the path. We descend along it

Tour: (machine translated)
All rappels from trees. We start with an 8m rappel that can be avoided with care. A couple of ledges follow and we reach the vertical part, 35, 20, 55 and 25.

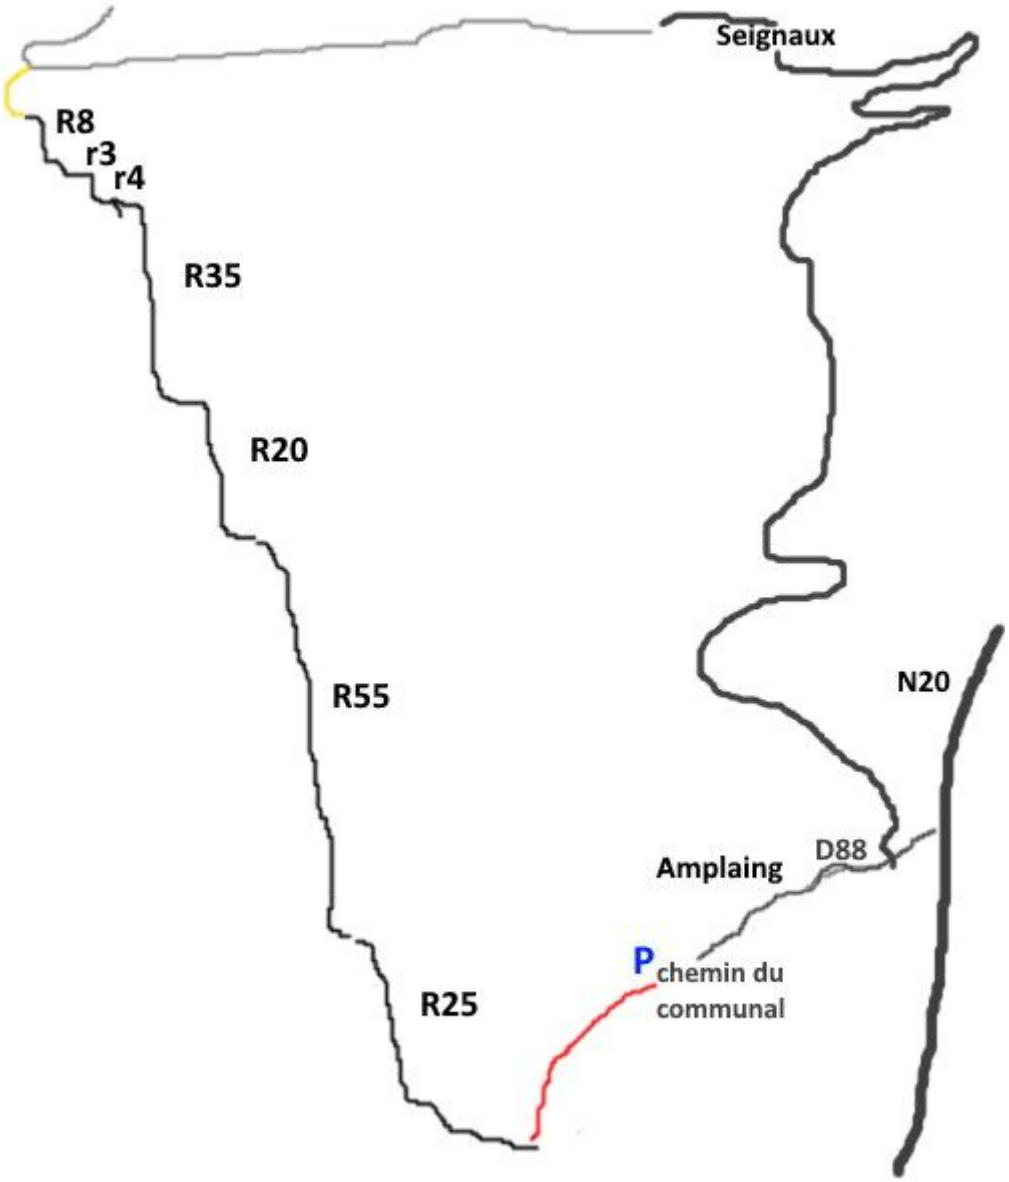

Return: (machine translated)
We will have to go through the forest on the orographic left of the stream until we find a path that takes us to where we left the car.
