Canyon length: 400m	**Highest rapell:** 31m	**Amount rapells:** 10
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 2 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Nice canyon above Alcoy, in limestone and generally dry except after rains. We will find, however, in the final pool with the possibility of making the zip line (provide material for it).

Hydrology: (machine translated)
In the open part

Access: (machine translated)
Getting to Alcoy.
We will park one car at the exit of the street maestro.
With the other car we will go up to the Preventorio.

Approach: (machine translated)
If we have two cars from the prevenorio it is immediate.
With one car, we will go up the street of the San Vicente school towards the Preventive Center. At the top of the street we will take the fork to the right. We make the two curves and at the end of them there is a path that goes up the slope towards the preventorio.

Tour: (machine translated)
A first rappel that can be split, followed by a zone of dexterity to then return to rappels. In the final part we will have the possibility of doing a zip line in the last rappel to avoid the pool, to secure the zip line because the reception can be hard.

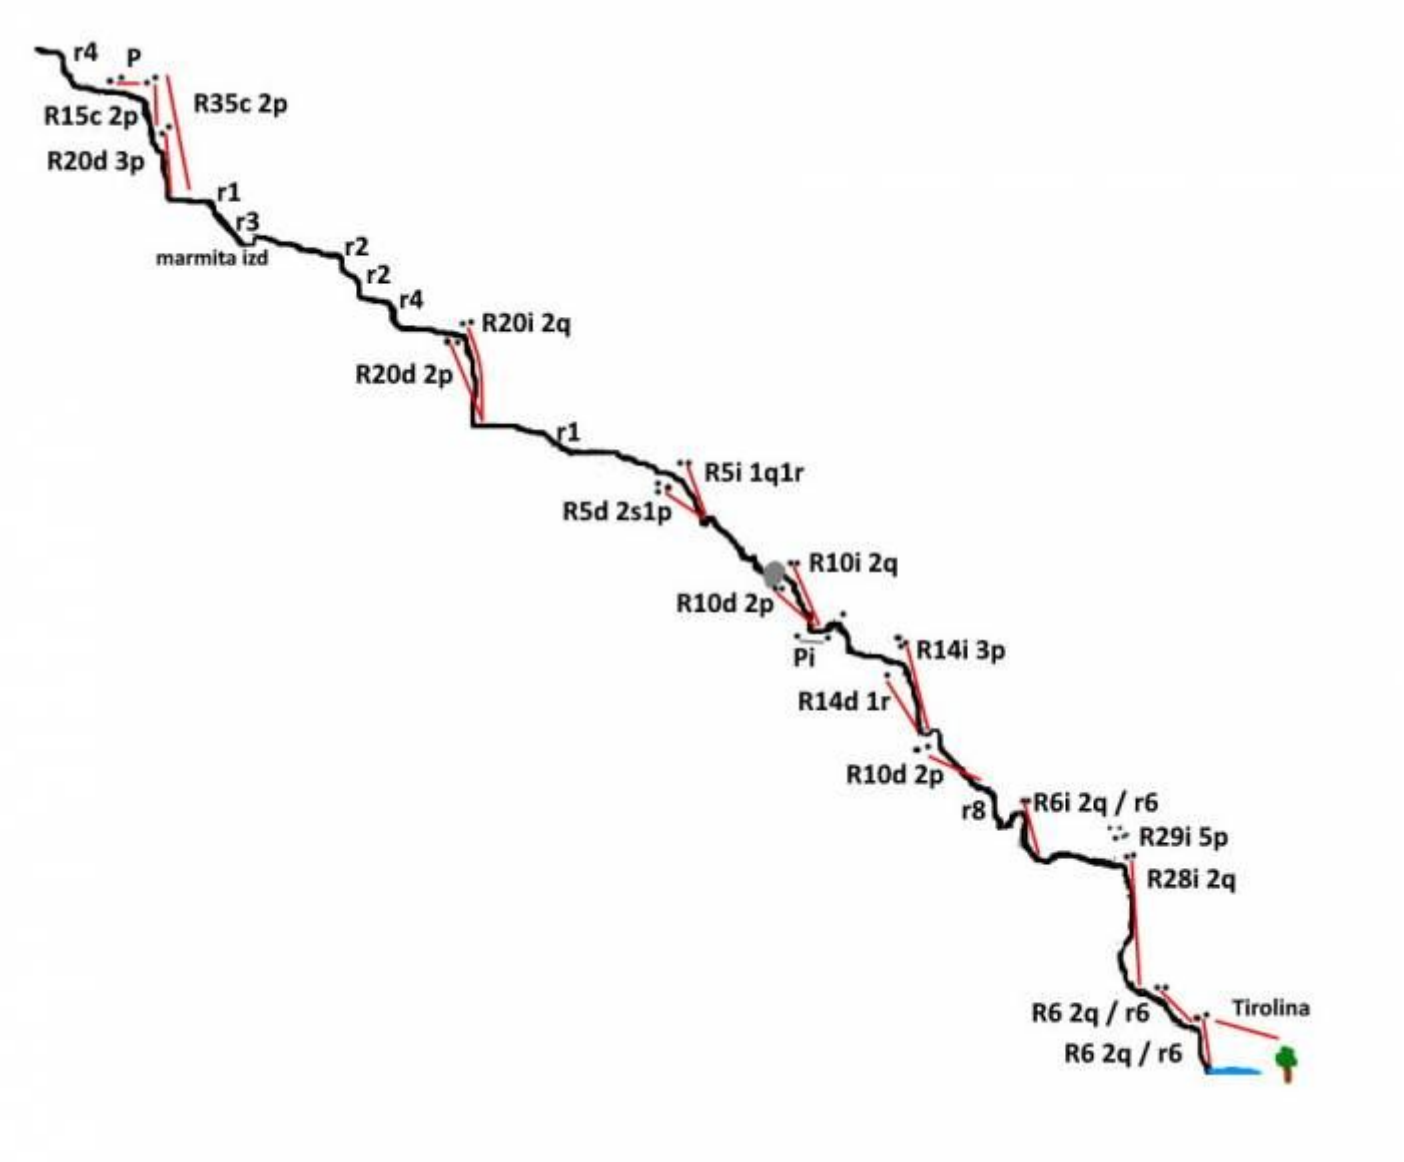

Return: (machine translated)
Climbs onto the street bridge

Coordinates:
Canyon Start 38.7003 -0.4919
