Summary: (machine translated)

Very short but chic canyon. The stream later flows into the Gole Aranciara.

Hydrology: (machine translated)

Without sufficient water, the canyon is rather uninteresting.

Access: (machine translated)

From Limina, follow the wide road to the exit of the asphalt 37°56.72708'N, 15°15.22607'E. Park here or continue for another 3 km if the car can take it and paint scratches are not a problem.

Approach: (machine translated)

Before the large bridge at the interruption of the small wall 37°55.92842'N, 15°14.03908'E in a serpentine down to a kind of ford (entry)

Tour: (machine translated)

This is followed by some short chutes and steps that are well equipped with anchors. Then comes the highlight of the canyon, the 10 m rappel in the waterline. If the water pressure is too high, you can rappel directly into the pool to the right of a somewhat hidden sling on a clamping block. A small step follows and you slide through a chute into the last pool 37°56.07888'N, 15°14.04236'E.

Under the bridge there is another pool with a swimming area where you may be able to make a small jump.

Otherwise the pools are too shallow for jumping.

Return: (machine translated)

Climb a small side stream on the left and up the steep slope and you will reach the entry point along the canyon in a few minutes.
