Country: España / Spain **Region:** Andalucía / Andalusia **Subregion:** Granada **Town:**		
Difficulty: not as difficult	**Grading:** v3 a1 II	**Total time:** 1h45
Approachtime: 35min	**Tourtime:** 1h	**Returntime:** 10min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 160m	**Highest rapell:** 35m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()
Specialities:		
Gear:		

Summary: (machine translated)
Dry canyon of the Angostura ravine, perfect to combine with the Bco Mina and the Geoda mine. Quite vertical and little frequented, a lot of caution with the frictions in the rappels, almost all the headers are delayed with respect to the vertical.

Hydrology: (machine translated)
Given the steepness of the terrain, escapes are compromised.

Access: (machine translated)
We will have to be located in Albuñol.
Arriving from the beach by the A345 we will cross the Angostura wadi and just after passing the bridge and with Albuñol in front of us, we will have a small road on the right that goes up the orographic right of the wadi. We will go up until just a moment in which the road turns left and leaves the rambla.

Approach: (machine translated)
In front of the parking lot, on the other side of the wadi, there is a very clear path that leads to the mines. Along this trail/track we climb almost 1km until we see the riverbed on our left.

Tour: (machine translated)
Dry, open descent, wide headwaters requiring delayed installations and the use of anti-rocks

Return: (machine translated)
When we reach the Angosturas ravine, we will follow it down to the parking lot.

Coordinates:
Canyon Start 36.7951 -3.1924
Canyon End 36.7951 -3.1924
Unknown 36.7988 -3.1869
Unknown 36.8018 -3.1826
