Country: España / Spain **Region:** Asturias, Principado de / Principality of Asturias **Subregion:** Asturias **Town:** Peñamellera Alta

Difficulty: easy	**Grading:** v2 a2 II	**Total time:** 3h25
Approachtime: 1h	**Tourtime:** 2h	**Returntime:** 25min
Altitude entry: 225m	**Altitude exit:** 155m	**Delta Altitude:** 70m
Canyon length: 400m	**Highest rapell:** 10m	**Amount rapells:** 5
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:** North	**Best Time:**
Rating: ☆ 2.9 (2)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 1x25m

Summary: (machine translated)
Varied rappel canyon. The parts above the "tramo med." are forbidden. There is also a lower part from the bridge to the mouth of the Rio Cares.
According to https://www.docuwiki.infobarrancos.es/doku.php?id=barrancos:asturias:trescares, access to the "middle zone" is prohibited. This middle zone probably does not include the Rubó med. as infobarrancos.es only mentions a ban on the R. superiore at the beginning.

Hydrology:

Access: (machine translated)
Coming from Santander on the highway, 12 km after San Vicente we turn onto the AS 114 leading to Arenas de Cabrales and the Cares canyons. After about 20 km we reach Trescares, driving up the Rio Cares. A few hundred meters after the village we park the car in a bay above the Romanesque arch bridge 'Puente la Vidre'.

Approach: (machine translated)
Cross the bridge (fancy a high jump?) and head uphill to the left for a few meters; the path then continues at roughly the same height along the slope above the Rio Cares. At a fork to the right, continue straight on until you reach a house where the Trescares comes down from the right. We change direction 90 degrees to the right and ascend above the stream. Cross the 'Puente de Madera' to get to the orographic right side of the stream. We continue upwards until we leave the path to the right on clear footprints and cross the slope only slightly ascending to the entry into the Trescares. This is fed here by a spring - Fuente Recuencu.
.fed by a spring

Tour: (machine translated)
5 rappels, some slides, a grotto, see photos and video

Return: (machine translated)
Exit to the left at the Puente de Madera and return along the approach path.
The next part to the mouth of the Riu Cares can also be walked, but is not particularly attractive (details at https://www.docuwiki.infobarrancos.es/doku.php?id=barrancos:asturias:trescares)

Coordinates:
Canyon Start 43.3109 -4.7070
Canyon End 43.3123 -4.7065

Automatisch importiert von Descente-Canyon.com für Canyon Trescares Parcours de la partie médiane et inférieure avec nos 2 enfants (8 et 10 ans).On a marché 1h en approche et nous sommes arrivés trop haut dans la fin de la partie supérieure qui était sèche. Tomber sur la résurgence de la partie médiane semble difficile (chemin peu marqué). Peut être se fier au bruit de l'eau. Si vous n'entendez plus l'eau qui coule c'est que vous êtes trop haut.On est descendu dans l'actif à droite sur la cascade de 8m mais il y a aussi un équipement à gauche hors d'eau. La partie inférieure du canyon glisse beaucoup (rocher rouge). Un groupe de 30 personnes avec 3 guides à 11h au parking... Ils faisaient que le bas! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21650/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Trescares Nous avons parcouru la partie moyenne et inferieure conformément à la description d'un topo "40 barancos Asturia". Le canyon est assez arrosé, sans problème pour des adultes encadrés. Un guide local nous a averti que les parties sup et moyennes sont définitivement fermées sous peine d'amendes salées... Parc national oblige. A confirmer. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21650/observations.html)
