Specialities:

Gear:

Summary: (machine translated)
Short but very interesting gorge, especially with the right flow, although we will generally find it dry. Facilities a little old

Hydrology: (machine translated)
Not in the gorga

Access: (machine translated)
From La Seu d'Urgell or from Sant Llorenç de Morunys on the C-462.
At p.k. 53,6 we have the detour to Sorribes de la Vansa and Ossera. We will pass Montargull and soon we take the detour to the left to Ossera. We will go up to the beautiful village, just at the entrance we have parking on the right.

Approach: (machine translated)
We walk back to the previous curve (last hairpin of the climb), here we go to the meadows in search of the stream bed that is a few meters below. Once in it we will only have to follow it until the confluence with our ravine.

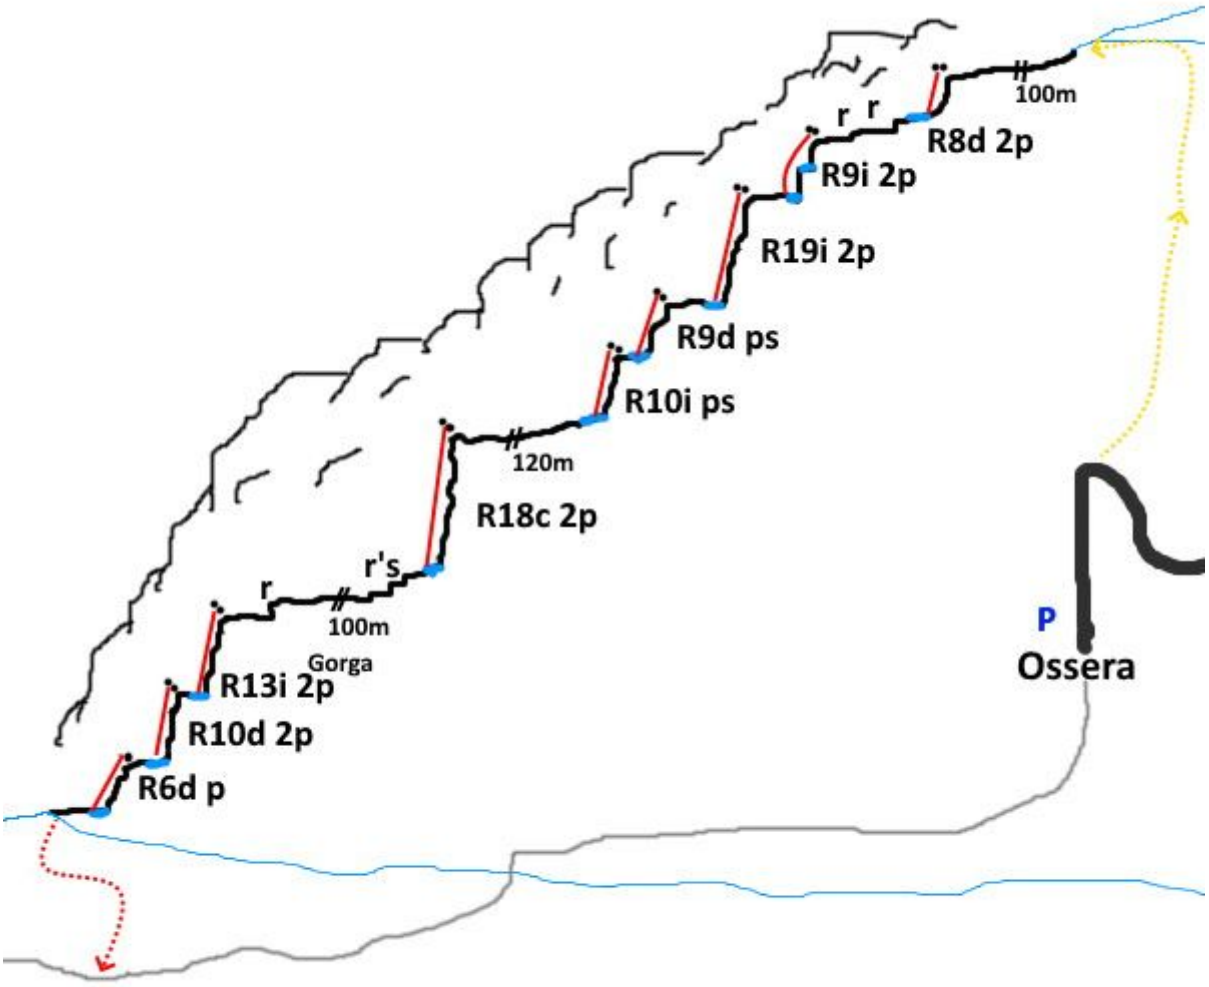

Tour: (machine translated)
Short but very interesting little gorget, in spring with water it is a very good option to get to know this small descent.

Return: (machine translated)
Once the last rappel is finished, the gorge opens up, a torrent arrives on the left and it is time to cross it and go up that slope, without a defined path, until we find a path. We will follow it towards the south, soon cross the stream and turn left towards the village.
