Summary: (machine translated)
Entire canyon day tour; up to the weir hiking canyon with some climbing passages; after the reservoir very rewarding; 50m rappel; up to the reservoir sandy (muddy) bottom; 3 entry points; high rock walls; for the complete tour scaffolding; the lower part is the most beautiful and reachable in 20min via path 267 from the village of Campione...

Hydrology:

Access: (machine translated)
From Torbole towards Riva del Garda then on the SS45 through Limone to the town of Campione (exit in the tunnel). You park the shuttle car near the stream. With the 2nd drive back on the SS45 and continue up towards Tremosine. At Pieve follow the road towards Pregasio. After a while you reach the small village of Cadignano. Here you turn left and drive up to the terraced parking lot. Park here. (If you go only the lower part of the canyon, you can do without a 2nd PWK).

Approach: (machine translated)
From the parking lot near the group of houses with stone passage (fountain) follow the right path 203 and 204 down to the bridge Preone(290Hm).

Tour: (machine translated)
There are 3 walk options. 1. (4,5-5h) Campione from start to exit. From the bridge Preone (290Hm) you rappel from the exposed chain anchor 25m into the canyon (for this variant you park in the village Cadignano) 2. (ca. 8h) Tignalga + Campione (see description Tignalga) 3. (ca. 1,5h) After the reservoir at the weir. For this variant you have to go up path 267 from the village of Campione for about 20min). Most of Campione is a hiking canyon with small climbing passages and steps over fixed ropes. There are always small tributaries. In the middle part there is a 90° right bend. After that the canyon narrows. Over several slippery climbs and walking passages you come at the end to 2 artificial slopes and the reservoir. Here swim out to the right and climb to the left over the weir and barrier. Afterwards, the gravel path leads back down to the right to the stream. Now swim/walk approx. 100m to wall with water level station. When you have climbed up the wall you can get out on the right via the emergency exit (hiking trail 267). The most beautiful part of the tour starts here. You start with a 25m rappel left into a grotto with, depending on the water level, dry/full pools. A short rappel or jump of about 7m leads to the exposed stance of the 50m rappel (for the rope retrival a 60m rope is recommended). After a 30m narrow swimming passage there are 3 more rappels of about 10m. The first place can be rappelled on the left or on the right or after checking the water depth on the right of 10/8/6m you can jump into big pools. Short walking and climbing passages follow until the last rappel left 10m. The next passages are bypassed on the left over rocks before descending back into the stream before the bridge. Now follow the shallow streambed to the gravel beach.

Return: (machine translated)
Turn right across the beach to the parking lot (shuttle car).

Nice short canyon. Poor anchoring. Flex and drill would have been appropriate. (machine translated)
