Country: España / Spain **Region:** Aragón **Subregion:** Huesca **Town:** Valle de Echo		
Difficulty: not as difficult	**Grading:** v3 a2 II	**Total time:** 5h30
Approachtime: 2h	**Tourtime:** 3h	**Returntime:** 30min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 2000m	**Highest rapell:** 18m	**Amount rapells:** 10
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
The canyon is quite unknown due to its long approach for what the canyon offers. Collecting

Hydrology: (machine translated)
In general, in almost all of the route you can go out on both slopes.

Access: (machine translated)
On the N240 between Jaca and Pamplona, just at Puente de la Reina we have the detour to Valle de Hecho (A176). We will continue along this road, leaving behind the detour to Aragües and Jasa until the detour to Urdués on our right. Nice mountain road that zigzags up to this village.
We will cross the village and continue along the track that goes straight ahead. It is assumed that the passage is restricted but you will have to inform you there of this point.
We will go up the Romaciete river by the track to the Ramirez river and here we will have to park.

Approach: (machine translated)
We will follow the river to its confluence with our ravine and through the forest we will climb a hill to a free refuge in this area. We will continue climbing this hill leaving the forest behind us until an altitude of about 1900m with our ravine always on the left. At this height we will look for the best way to access the stream.
It is a long and hard access but the views are worth it.

Tour: (machine translated)
Dry in summer, at least in its upper part, it seems that in spring it can carry good flows, in which case we must be cautious with many of the slopes. For the most part it is quite open.

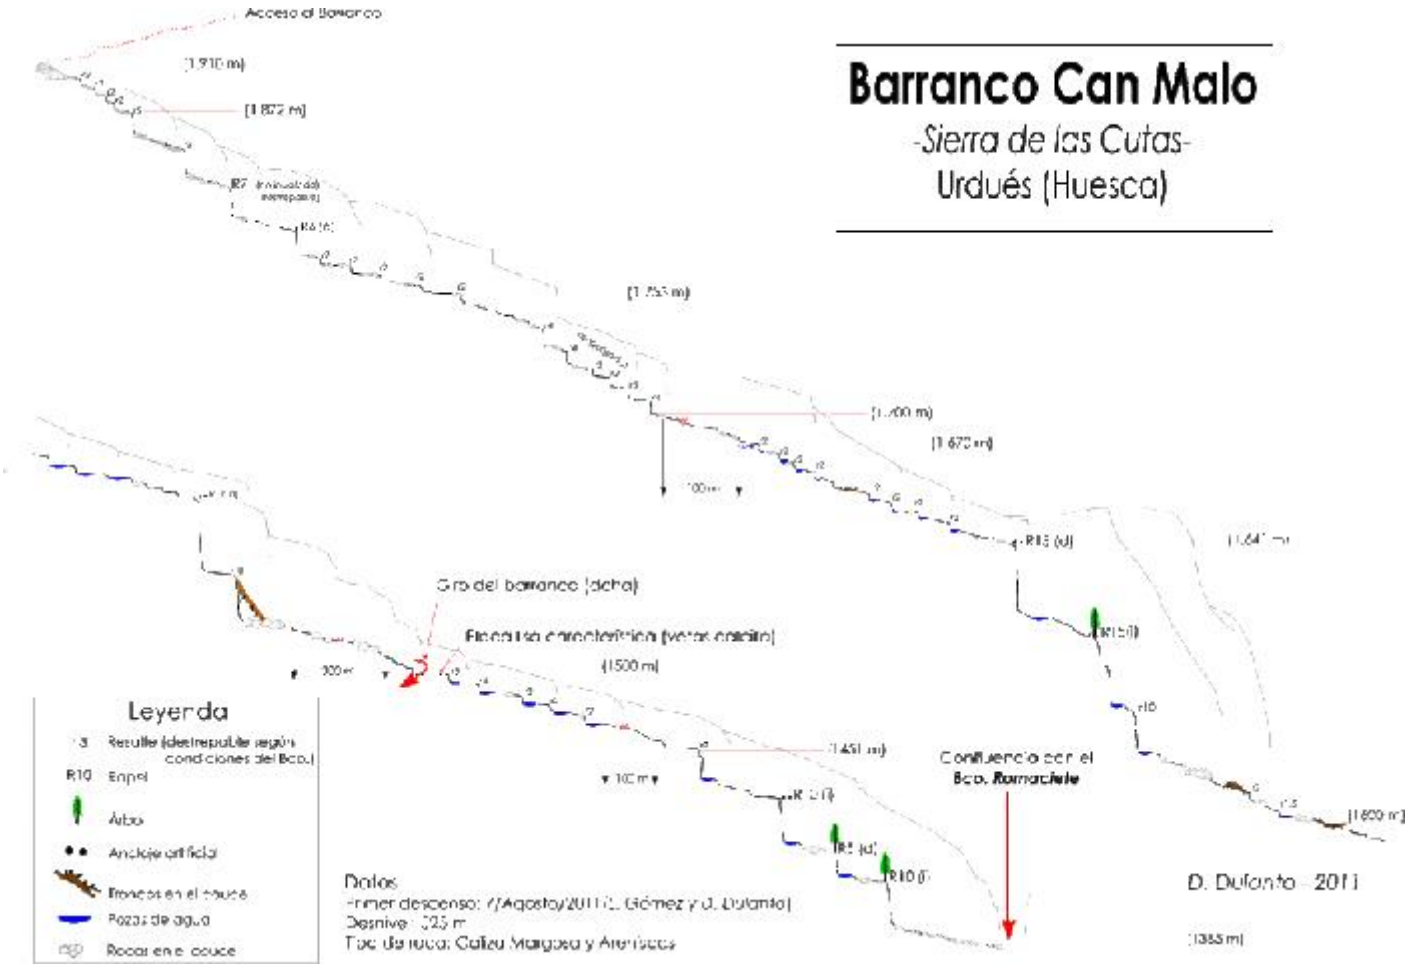

Return: (machine translated)
When we reach the confluence of the rivers, we will have to undo the access road.

Coordinates:
Canyon Start 42.7570 -0.6816
