Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 2.9 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Also known as Gave du Brousset, it is an aquatic and, in summer, perfect canyon for beginners. Possibility of multiple jumps and a couple of very aesthetic rappels.

Hydrology: (machine translated)
In open areas

Access: (machine translated)
We must be located at the foot of the Midi d'Ossau.
From Pau by the N134 towards Laruns and then by the D934 towards Gabas.
From Sallent de Gállego by the A136 we cross the Portalet and go down towards Gabas.
At 3 kms from the pass, towards Gabas, we have a sharp turn to the right and a bridge that marks the beginning of the descent. Here you can leave the access car (P1).
We continue towards Gabas, after the switchbacks, we arrive at a half-trail with a very open left curve and a place to park on the right (P).
If we continue a little more we will arrive at the exit of the ravine with an area on the right to park (P2).

Approach: (machine translated)
We go over the bridge, follow the wall and 50m further up we see the access

Tour: (machine translated)
Multiple jumps/destepes and two rappels of 15m very aesthetic. Outside the thaw season it is ideal for beginners.

Return: (machine translated)
In any of the open areas or after the last rappel. We have exits to the left and right

Coordinates:
Canyon Start 42.8220 -0.4044
