Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Simple ravine in the area of Igueste, short and easily combinable with Lomo Alférez, Gotera,... Obligatory combination of vehicles.
Magnificent views, like its neighboring bcos, with a relatively short access and an almost immediate return.

Hydrology: (machine translated)
To be investigated

Access: (machine translated)
We must be located in Igueste, next to Candelaria.
Location of the Igueste-Hondo ravines
We will leave the return vehicle on the TF-28 at p.k. 13.2 next to the bridge over the Los Poqueros river, next to the Agrícola bar.
With the access vehicle we go back to k.p. 10 to turn off to Barranco Hondo, we will go up the main road to look for the soccer field, just before there is a crossroads with Tostón street where we will go down until almost a curve, on the right there is a small street, Las Morretillas, where we will park.

Approach: (machine translated)
Access to Igueste-Hondo ravines
We continue along the street until the end to turn right, without path, as to access the Lomo Alférez or Cueva de la Campana which is already evident, we will reach the riverbed and follow it south to an agricultural track, here we will turn right following the track about 100-150m until the next riverbed.

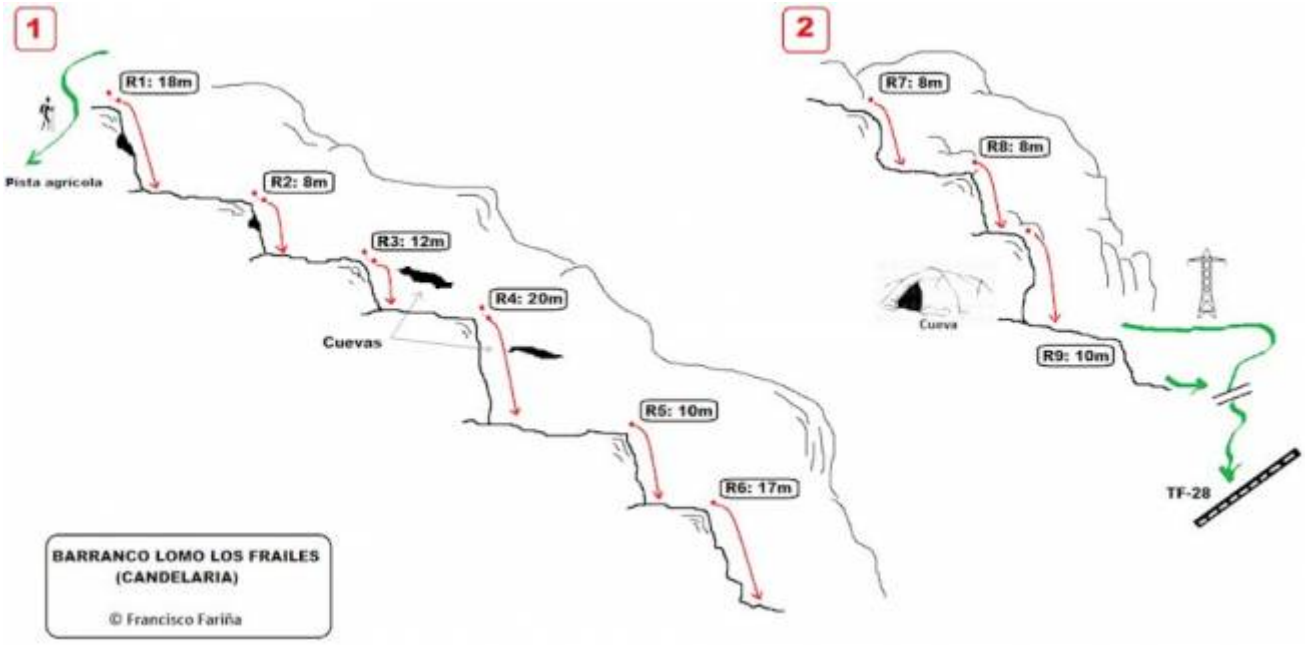

Tour: (machine translated)
See topo.
We will make 9 rappels, after the last one we go to the left towards the high tension tower, here we would have a last rappel already avoidable.

Return: (machine translated)
From the turret we can follow the hill to the road, if we do the last rappel we will follow the riverbed to the road. In both cases we take it to the right up to the bar.

Coordinates:
Canyon Start 28.3936 -16.3594
Canyon End 28.3894 -16.3635
