Summary: (machine translated) Short but narrow and impressive gorge in alpine environment		
Hydrology:		
Access: (machine translated) From Cimolais turn into the valley of the Cimoliana and follow the road to the toll hut (toll 2014: 6 EUR per vehicle). Continue up the valley to the large parking lot at the mouth of the Valle Santa Maria.		
Approach: (machine translated) Cross the two streams and follow the marked trail through beautiful deciduous forest to a crossroads. On the right, follow the signs 'Biv. Gervasutti' descending to the streambed, cross the stream and hike shortly to the SE to a forest road, follow the forest road briefly and then descend again to the streambed. In the current tabacomap the old path is still marked - however, this path has been abandoned. Climb steeply up the western bank and in a long left turn climb about 200m until the path descends into Valle Santa Maria. Soon steeply up again until the valley widens - here you can downclimb for the first time over a streambed coming from the left. Branch off from the path at about 1290m.		
Tour: (machine translated) About 15 minutes of hiking/downclimbing until the valley narrows into a gorge. From here there is no escape route. This is followed by 8 rappels (max. 6m) of hourglass slings or 6mm rock bolts with 2 chain links before the gorge opens up briefly and you can exit on the right via a path marked with cairns. Two more beautiful waterfalls follow, the first of which leads briefly through the water jet. The canyon then exits and you soon reach the hiking trail from the access point.		
Return: (machine translated) Ascent - alternatively you can descend via a path on the orographic left side of the valley.
