Ual Da Niemet

Val Niemet,Innerferrera

Create: 2023-10-10 22:28:39	**Update:** 2025-11-16 11:58:24	**Print:** 2026-11-10 02:11:24
Country: Schweiz / Switzerland **Region:** Kanton Graubünden **Subregion:** Region Viamala **Town:** Innerferrera		
Difficulty: a little difficult	**Grading:** v4 a4 II	**Total time:** 3h40
Approachtime: 30min	**Tourtime:** 3h	**Returntime:** 10min
Altitude entry: 1584m	**Altitude exit:** 1442m	**Delta Altitude:** 142m
Canyon length: 450m	**Highest rapell:** 42m	**Amount rapells:** 15
Transport: on Foot	**Rock type:** gneiss	**Drainage area:** 20.00km²
Season: July - October	**Orientation:** Northeast	**Best Time:** 10-17 o'clock
Rating: ☆ 4 (7)	**Info:** ★ 2.2 (6)	**Belay:** ★ 2.4 (7)

Specialities:
Glacier in drainage area, Dam (inform operator),

Gear:
Ropes: 2x40

Summary: (machine translated)
Nice short fun canyon. Great finale with a jump into the lake.

Hydrology: (machine translated)
Before the tour, be sure to call the info line at +41816353411!

Kraftwerk warns of automatic flap

Access: (machine translated)
After the village of Innerferrera, turn left before the large bridge, drive under the bridge and turn right into the parking lot just before the small bridge.

Note: The parking lot described in the book "Swiss Alps Canyoning Vol. 2" is located behind a driving ban. Access is therefore not officially permitted.

Approach: (machine translated)
From the parking lot, cross the small bridge and follow the path past the sawmill. Then follow the path uphill to about 1623 m above sea level.M.. There, a path branches off to the right down to the access bridge.

Entry to the canyon is either directly from the bridge by rappel or a few meters upstream over the side down into the streambed.

Tour: (machine translated)
The tour is hardly vertical (only at the end when the lake is empty), but offers varied and fun jumps between 2 and 10 meters as well as one or the other slide, which can also be done several times.

Attention: In the pool under the slide T25 (according to Swiss Alps Canyoning Vol. 2) there are already rocks about 0.5 meters below the water surface. These are not loose blocks, but solid ground.

Return: (machine translated)
Then a longer swim to the inlet and in 5 minutes to the parking lot in front of the sawmill.

Coordinates:
Canyon Start 46.5212 9.4344
Canyon End 46.5235 9.4392
Parking Entry and Exit 46.5200 9.4431
Alternative Canyon Start 46.5227 9.4374

very fun and beautiful canyon. Very cold, there was snow in the valley and the canyon had to be done with gloves and very thick wetsuit. We could not stay in the waterford long. Tobogans are very fun and anchoring is ok but not placed professionally (hooks not deep enough) . We called the dam and they didn’t really understood what we were going to do but that there were no water releases that day.

Automatisch importiert von Descente-Canyon.com für Canyon Ual da Niemet Le responsable de la centrale hydroélectrique nous a dit qu'il y avait très peu d'eau dans le canyon – bien moins que dans le livre, mais tout de même suffisant. La qualité des ammarages pourrait être nettement meilleure. Il y avait quelques toboggans amusants. Nous sommes sortis au pont pour éviter une baignade prolongée dans le lac froid. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23931/observations.html)

Nice canyon. Very cold and clear pools at this time of year, small but sufficient amount of water. Great view of the mountains. Anchoring is very questionable in places - many anchors loose or not professionally installed (e.g. not drilled deep enough) (machine translated)

The water was already cold. All the slides were doable. We also slid the T25, the stone exists (as we discovered 4 times). (machine translated)

The water is still rather cold, but crystal clear. T25 we rappelled down, the rock in the pool was too tricky for us. At 3 pm the lake is empty and you can't jump (see photo). We walked up the lake to the parking lot at the Werkhof. (machine translated)

Nice short fun canyon. All slides and jumps OK. All anchors OK. Power station warns of automatic flap. 170l/s more at opening seems reasonable to us. Helpful information. Great finale with a jump into the lake. Then a little longer swim to the inlet and in 5 min. to the parking lot in front of the sawmill (machine translated)
