Summary: (machine translated) Nice short fun canyon. Great finale with a jump into the lake.		
Hydrology: (machine translated) +41816353411 Power plant warns of automatic flap		
Access: (machine translated) After the village of Innerferrera, turn left before the large bridge, drive under the bridge and turn right into the parking lot just before the small bridge. Note: The parking lot described in the book "Swiss Alps Canyoning Vol. 2" is located behind a driving ban. Access is therefore not officially permitted.		
Approach: (machine translated) From the parking lot, cross the small bridge and follow the path past the sawmill. Then follow the path uphill to about 1623 m above sea level.M.. There, a path branches off to the right down to the access bridge. Entry to the canyon is either directly from the bridge by rappel or a few meters upstream over the side down into the streambed.		
Tour: (machine translated) The tour is hardly vertical (only at the end when the lake is empty), but offers varied and fun jumps between 2 and 10 meters as well as one or the other slide, which can also be done several times. Attention: In the pool under the slide T25 (according to Swiss Alps Canyoning Vol. 2) there are already rocks about 0.5 meters below the water surface. These are not loose blocks, but solid ground.		
Return: (machine translated) Then a longer swim to the inlet and in 5 minutes to the parking lot in front of the sawmill.

The water was already cold. All the slides were doable. We also slid the T25, the stone exists (as we discovered 4 times). (machine translated)

The water is still rather cold, but crystal clear. T25 we rappelled down, the rock in the pool was too tricky for us. At 3 pm the lake is empty and you can't jump (see photo). We walked up the lake to the parking lot at the Werkhof. (machine translated)

Nice short fun canyon. All slides and jumps OK. All anchors OK. Power station warns of automatic flap. 170l/s more at opening seems reasonable to us. Helpful information. Great finale with a jump into the lake. Then a little longer swim to the inlet and in 5 min. to the parking lot in front of the sawmill (machine translated)
