Country: Italia / Italy **Region:** Trentino-Alto Adige **Subregion:** Trento / Provincia autonoma di Trento **Town:** Canal San Bovo

Difficulty:	Grading: v? a? ?	Total time:
Approach time:	Tour time:	Return time:
Altitude entry: 1190m	Altitude exit: 760m	Delta Altitude: 430m
Canyon length: 1000m	Highest rappel: 81m	Amount rappels: 29
Transport:	Rock type:	Drainage area: 5.00km ²
Season: May - October	Orientation:	Best Time:
Rating: ★ 0 ()	Info: ★ 0 ()	Belay: ★ 0 ()

Specialities:

Gear:

Ropes: 2x 80m

Summary: (machine translated)

The most beautiful and branchy part is the upper section with 14 abseiling points and 250 m difference in altitude. This is followed by an intermediate section up to the water inlet, which affects the flow. In the lower part, although with very little water, there are some beautiful verticals in a worked granite environment (80 m drop).

Hydrology:

Access:

Approach: (machine translated)

ACCESS: from the locality "al lago" at km 1.2 of the S.P.56 Canal San Bovo-Caoria, take the ENEL path directly from the house in front of the parking lot and follow it comfortably to the water intake (beginning of the lower part) in about twenty minutes. Now continue to the right on a clearly visible path, following the blue markings, until below the last waterfall of the upper part, where you cross the stream, continue along a chute, always faithfully following the blue markings, after this rather uncomfortable part, take a nice ledge on the right that leads to a collar from which you can see the upper part of the canyon. From here, go around a chute and then cross towards the stream on the right (blue markings) to reach the start of the canyon slightly downhill, right at the first beautiful 25 m high waterfall. (50min- 1 hour)

Tour: (machine translated)

The most beautiful and branchy part is the upper section with 14 abseiling points and 250 m difference in altitude. This is followed by an intermediate section up to the water inlet, which affects the flow. In the lower part, although with very little water, there are some beautiful verticals in a worked granite environment (80 m drop).
