Summary: (machine translated)
Practically collecting, vertical ravine, like the rest of the Ribeira Sacra, which flows into the Sil. Generally without water except in rainy periods, we will have to go out on the Sil (someone with a boat waiting for us). Except after rains, with good flow, perhaps it does not have enough interest.

Hydrology:
No

Access: (machine translated)
Situated in the Ribeira Sacra, we must focus on Nogueira de Ramuín (Luíntra).
From there we will leave by the OU-0508, towards the monastery of Santo Estevo and its parador, after 5kms we will pass it, we leave it on the left. We follow the road to Loureiro and 5km later Cerreda on the left, we continue a couple of kilometers more until Vilouxe/Cimadevila, on our left, where we will park.

Approach: (machine translated)
We will go east following the high voltage line to the riverbed.

Tour:
Ver topo

Return: (machine translated)
When we arrive at the Sil, we must take a boat to go to the wharf.

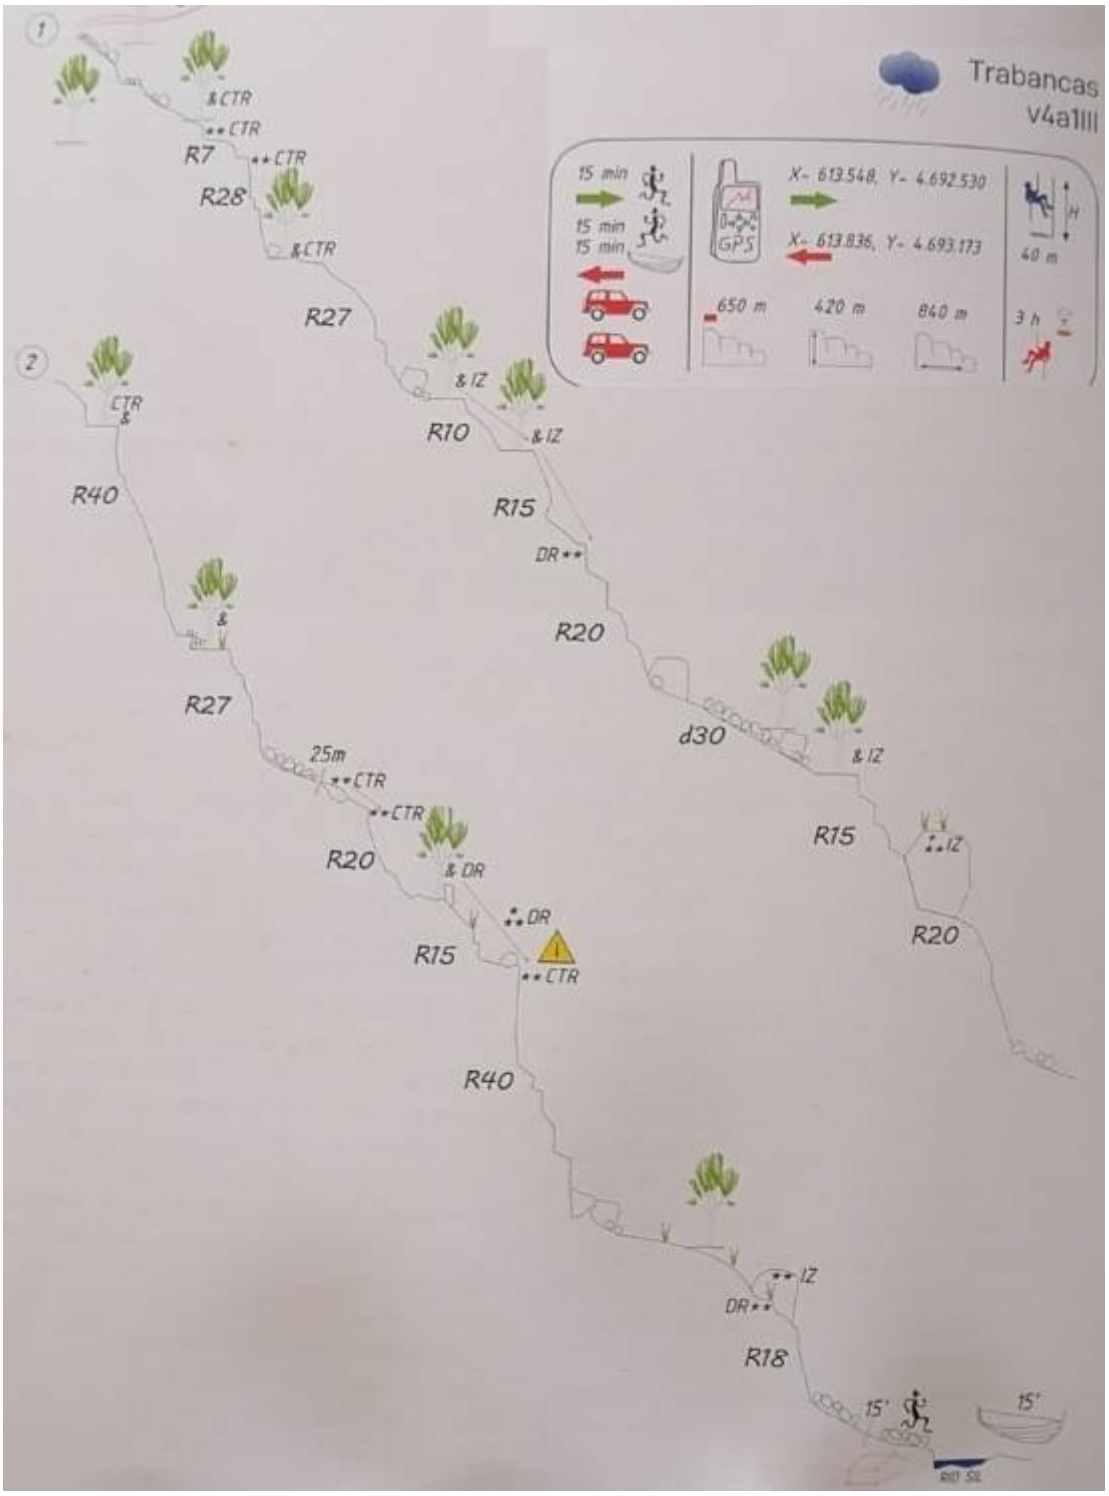

Coordinates:
Canyon Start 42.3825 -7.5678
